India Says akistanis **KillGuards**

ttempt Seen o Seal Border

qgW DELHI, May 27 (UPI).— tian officials said today that 2 Pakistani Army was trying to off a stretch of the 1,400-le East Pakistan border with dia where troops of the two tions have exchanged artillery d machine-gun fire during the it few days.

The official Indian radio rert followed accounts of at least etstanis and the Indian Border curity Force (BSF) along East kistan's northern and northstern frontier with India.

India said yesterday that at ast nine of its BSF guards were iled in a Pakistani shelling and schine-gun attack Tuesday on te border post of Dalu, about 0 miles north of the East akistani capital of Dacca. Ofcials said it was the highest sualty toll among the border lards since civil war broke out East Pakistan March 25. The officials warned that if ich attacks continue, India will

old Pakistan responsible for the msemiences. The Indian radio also reported nat Pakistani troops fired at Benali rebels making forays across he border from sanctuaries in ndia and sent barrages down on

ndian territory near Tamabile, n Assam State. Toll Announced

In a later report, the Press Trust of India (PTI) said that at east 35 Pakistani Army troops nere killed and several injured in the fighting at Tamabile. 1 TI. quoting reports from the

border areas, said the rebel "Ben-ga! Liberation Army Forces" and Palistani Army troops fought a bitter battle for ten hours this

morning at Tamabila. PTT did not mention camalthe among the rabel forces. The Tellin spency said that the Pakistaris were forced to withdraw.

Racio Pakistan, in a broadcast Tuesday monitored in New Delhi, mid a naval patrol sank two Aputs laden with munitions on a miles inside East Pakislan's western frontier. The offiglal radio said several Indian "infillrators" manning the craft were killed and several captured.

Martial Law Decreed The radio also announced that President Agha Mohammed Yanya Khan issueda martial law decree Tuesday authorizing prochecial governments to dissoive oral and municipal councils arcarhout Pakisian, at their diserction, beginning next month.

The radio gave no reason for Only Monday, Mr. Yahya had one on the radio to say he would announce within two or hree weeks his plans to transer power throughout Pakistan to

avilian authorities. The Indian radio said that alhough the Pakistani Army was iot able to seal off the fruitler. he number of refugees fleeing nto India had dropped during he past few days, from about 0.000 a day to 50,000.

Indian Prime Minister Indira Jandhi said yesterday that the number of Bengalis seeking refage in India had possed the 3.5 nillion mark. She appealed anew or international intervention in last Pakistan, because any ailure to do so might lead to lisastrous consequences.

Austria, Peking Agree to Set Up Diplomatic Links

HONG KONG, May 27 (NYT). -Austrus and Communist China ave agreed to the establishment 1 diplomatic relations. Hamhua, he Chinese press agency, reportd today.

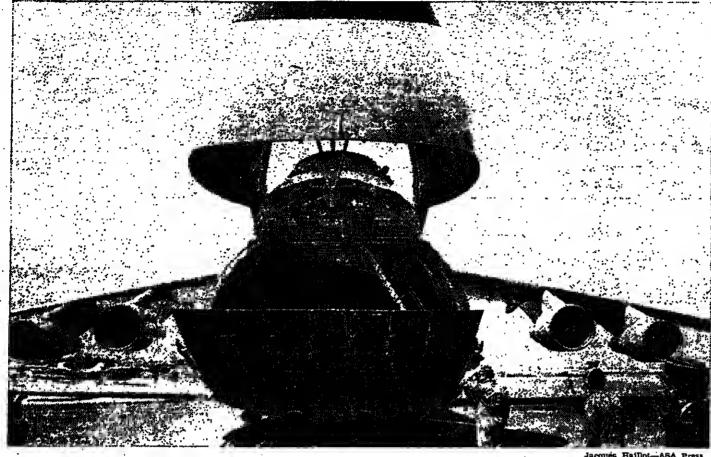

A Joint communique signed esterday by representatives of he two governments in Buchaest, capital of Romania, said he decision had been taken "m Reardings with the principles of artial respect for sovereignty nd territorial integrity, non-attricence in each others inernal alfairs, equality and muual benefit."

The communique said that muual recognition and the estabishment of diplomatic relations would take effect beginning totay. It added that ambassadors would be exchanged within eix

Laird to Submit It in July

NATO to Get U.S. Plan On Mutual Force Cuts

Melvin R. Laird, U.S. secretary of defense today promised to submit to the North Atlantic Alliance in July plans for mutual and balanced force reductions to be negotiated with the Soviet bloc. Mr. Laird sain that U.S. experts

are working on proposals and would submit them to the Na-tional Security Council in late He noted that there have also been studies mada by experts of the North Atlantic Treaty Or-

ganization (NATO), "I am not as satisfied with these as some people," he said, "I may be prejudiced, but I think that ours will be much more comprehensive and will be a great help to the allies," he

At the same time he said it would "be foolhardy and a great mistake" to attempt any unilateral troop cnts.

Mr. Laird arrived by plane today from Mittenwald, West Ger-many, there be attended a meeting of NATO's nuclear planning group (NPG). Tomorrow be will attend a meeting of defense ministers from 14 of the 15 NATO countries-all except France. Mediterranean Effort

Secretary Laird said the United States will be increasing its effort

in the Mediterranean.
"We hope," be added, "that our allies will realize the importance of this area to the security of Western Europe and the alliance as a whole." He said that at tomorrow's

meeting be will stress the importance of the Mediterranean and of recent Soviet moves there which bave changed the balance of power so far as the alliance is concerned.

He added that the United

States expects that the gromiscs will be kept that were made in the plan for alliance defense in the 1970s, approved last December.

the bid by Senate Majority Leader Mike Mansfield to halve U.S. troop strength in Europe shows that a majority of the Senate thinks this is not the time for the United States or any of its allies to take individual action to cut strength.

Meanwhile, Sen, Charles Percy, R., Ill., was warning Europeans not to be misled by the defeat of the Mansfleld amendment into thinking that the United States is satisfied with the present situation.

'Clear Majority' Sen. Percy said in an inter-

There is a clear majority in the Senate for serious troop reductions, unless the Europeans do something to reduce our balance of paymenta difficulties. We de not want these dollar crises." He said 58 senators, a clear

majority, had voted for one or another of the resolutions calling for negotiations on troop reductions with America's allies as well as with the Soviet bloc.

In a speech to the Military Committee of the North Atlantic Assembly, an international consultative body of legislators, he pointed to the connection between monetary and military He said: "One of Sen, Mans-

field's main arguments was that the same countries whose currencies are gaining strength at the expense of the dollar because of U.S. balance of payments deficits are the same countries unwilling to relieve the United States of its military balance of

payments deficit associated with

Gerard C. Smith, head of the U.S. delegation at the Strategic Arms Limitation Talks with the Seviet Union, held a consulta-tion today at NATO headquarters with the North Atlantic Council. The council includes ambassadors from all 15 member nations.

At the same time, defense ministers from ten of the European members met to discuss their forts. Last December they promised an extra billion dollars worth of military spending over

iive years.

Lord Carrington, Britain's defense minister, said that European governments recognize tha feeling in the United States that they should carry more of the (Continued on Page 2, Col. 5)

Four Jews Guilty of Anti-Soviet Activity

By Bernard Gwertzman . MOSCOW, May 27 (NYT).-The Latvian Supreme Court today found four Riga Jews guilty of anti-Soviet activity and sentenced them to terms ranging from one

to three years in prison camps. Tass, the Soviet press agency. said the four-day trial, which was held in a workers' club, ended when Judge Luka I Lotko read

the sentences Arkady A. Shpilberg, a 33-yearold engineer, received three years. one less than asked yesterday by the prosecutor, Dmitry F. Chibisov. The others received what he had demanded: Mikhail Z. Shepshelovich, a 28 - year - old worker, got two years; Boris M. Maftser, 24, an engineer, and Ruth I. Aleksandrovich, a 23year-old nurse, both got one-year

The sentences given the Riga

four were milder than those has not been disclosed, but prehanded out in the Leningrad sumably it covers petitions sent trials last winter and earlier this abroad complaining of Soviet month, in which some defendants policy toward Jews not wishing received as much as 15 years in to assimilate, and typewritten camps—the maximum term of material on various aspects of detention under Soviet law. Jewish life here.

This was presumably because the Riga four were not charged with either participating or as-sisting in plans to hijack a plane. In the Leningrad trials, 21 people -19 of them Jews-were convicted in connection with an apparent plan by 12 to hijack a plane last June.

Nine other Jews are awaiting trial in Kishinev on charges be-lieved similar to those brought against the Rigs four. The four in Riga were charged with re-printing and distributing "subversive" and "slanderous" material about the Soviet state, a crime punishable by up to seven years. The exact nature of the material

10 Years in Russian Prison For Defector Returned by U.S.

MOSCOW, May 27 (Reuters). —A Lithuanian seaman who tried in vain to defect to the United States last November has been sentenced to 10 years' imprisonment, a court official in the Lithuanian capital of Vilnius said today.

Simas Kudirka was returned to his shipmates by American coastguards when he leaped from his ship, the Sovietskaya Litva, while it was moored alongside the U.S. Coast Guard cutter Vigilant, off Martha's Vineyard, Mass, for a discussion on fishing rights.

Mr. Kudirka was tried last week by the Lithuanian supreme court in Vilnius on a treason charge, the court official said. Under Soviet law, flight abroad is punishable as treason with sentences ranging up to 15 years in prison or death by firing squad.

(The incident caused angry protests in the United States after it was reported that Mr. Kudirka was aboard the cutter several hours before the Rus-sians were allowed to take him

(It also prompted President Nixon to say later: "I was as an American outraged and shocked that this could happen."

(Three senior coastguard officials were relieved of regular duties while the government in-

plauded repeatedly throughout his address, received a standing ovation when he said:

"Nobody will ever be successful in taking Czechoslovakia out of the socialist camp. Nobody ever will be successful in breaking our friendship and frater-

Mr. Brezhnev landed Mr. Husak for having overcome the "counter-revolutionary intrigues" that he said had gathered force in 1968 Mr. Dubcek.

It was in August of that year that Warsaw Pact military forces led by Soviet units entered Czechoslovakia to end the liberal regime of Mr. Dubcek and pave the way for a return to more orthodox socialism under Mr.

The incursion was later justified by the Soviet leader as the duty of socialist states to intervene to protect their system against "revisionism." This policy of "limited sovereignty" in Eastern Europe became known as the "Brezhnev Doctrine."

Mr. Brezhnev, speaking in the Ozech capital nearly three years after Soviet tanks ringed its mam square, devoted a major portion of his 45-minute address to stressing the continuing need for independence among Warsaw Pact

Among those on the podium of the ornate Convention Hall were the leaders of East Germany, Poland. Hungary and Bulgaria, whose military units participated in the invasion. Only the Soviet forces, estimated at 80,000 soldiers, remain in Czechoslovakia.

Turkey Arrests 4 Suspects In Kidnap-Murder of Israeli

ISTANBUL, May 27 (UPI),---Martial law authorities announced the arrest tonight of four uspects in the kidnap-murder of Israeli Consul-General Ephraim

Three of the four were among the nine key suspects whose photographs are on 20,000 wanted posters on street corners all over Istanbul.

They included Necmi Demir and his wife likey Alpetkin Demir, the only woman among the nine, and Necati Sagiroghu. The fourth was named as Irfan Ucar.

The Demirs were the couple who rented the apartment in which Mr. Elrom was found shot to death Sunday, security offi-cials said, Leftist extremists kidnapped Mr. Eirom May 17 and threatened to kill him unless the government freed all "revolutionary guerrillas."

Police raiders acting on a tip seized the four in a raid on an epartment less than half a mile from the one where Mr. Elrom was slain, security officials said. The martial law authorities announced the arrests as the government marked the 11th anniversary of the military coup that overthrew Premier Adnan Menderes and said the constitu-

tion would be reinforced against

Briton's Life Imperiled

ROSARIO, Argentina, May 27 (UPD .- Leftist terrorists said today they will execute British consul Stanley Sylvester if police find the hidesway where they are submitting him to "people's justice." The communique, dated May 26, contained the first direct threat egainst Mr. Sylvester's life. The 58-year-old honorary con-

sul was kidnapped by three members of the leftist "People's Revolutionary Army Sunday morning. They have since issued three previous communiqués and said they were putting Mr. Sylvester to "people's justice."

Hanoi Confirms Recent Fighting At Angkor Wat

PARIS, May 27 (AP).—North Vietnam reported yesterday that there has been recent fighting in the area including the ancient temples of Angkor in Cambodia. The North Vietnamese delegation to the Vietnam peace talks relayed a dispatch from the Cambodian Communist news agency saying. "On May 13 and 14 (our) forces in the province Siem Reap eliminated 135 Phnom Penh soldiers and de-stroyed two military vehicles in the zone of the Angkor temples. On the night of May 13-14, (our) forces pounded several positions in the city of Siem Reap. destroying three barracks and two military vehicles." Siem Reap is a few miles from the main temple, Angkor Wat.

There was no indication in the report whether the temples had been damaged in the new fight-

Authoritative sources in Phnom Penh reported earlier this month that Cambodian government forces had shelled Angkor Wat in February. Cambodian officials later claimed the shelling was done by Communist forces.

2 Portland Spies Marry in England POOLE, England, May 27 (Reti-

ters).—Harry Honghton and Ethel Gee, both 56, the lovers who betrayed British naval secrets to the Soviet Union, were married here a month ego, it was disclosed today. The couple were the last con-

victed members of the Portland spy ring—tried in 1951—to be released. Their associates have all been freed from prison in Anglo-Soviet spy exchanges.
Mr. Houghton and Miss Gee,
56, were sentenced in 1961 to 15 years imprisonment for helping to steal naval secrets from the Portland naval base following a sensational spy case in England. The couple was released a year

Lord Carrington said plans are going well and the defense ministers will meet again on it toward the end of the year. Today they also discussed cooperation medical services. training,

logistics and communications. The Euro-group did not into the prospects of negotiating force reductions with the Soviet bloc. This would be done at a meeting of the foreign ministers of the alliance next week in Lisbon, Lord Carrington explained.

Laird Reassures Brandt BONN. May 27 (NYT) .- Secretary Laird has reassured Chancellor Willy Brandt that West Germany need not fear a loss United States interest in settlement of the Berlin problem in favor of agreements with the

Soviet Union on troop reductions

and strategic arms cuts.

Last week the Brandt government had become concerned lest U.S. interest in recent Soviet proposals to negotiate mutually salanced reduction of forces in-Central Europe and to limit strategic arms overshadow the 14-month-old negotiations on the Berlin issue.
Mr. Brandt himself binted at

this concern in a luncheon toast Tucsday at Mittenwald, in Ba-veria. But a Western official disclosed that Mr. Laird took the chancellor aside at an Atlantic Alliance conference there and conveyed assurances from the White House of U.S. interest in a Berlin settlement.

Italy Trade Unit Back From China

ROME, May 27 (UPI) -Trade Minister Mario Zagari led a trade mission home from Communist China today and said he thought China's leaders want to open that country up to contact with the West "Chou En-lai seemed to me to

be an extraordinarily solid man, man who certainly will build bridges." Mr. Zagari said when his 76-man mission arrived at Leonardo Da Vinci Airport. He said the Chinese he met considered Italy "a country very advanced technologically; and they look at us as a projection of Europe, which they regard with great attention and symnathy. It was the first official Italian visit since the two countries established diplomatic rela-

Chinese Foreign Trade Minister Pai Hsiang-kou accepted an invitation to visit Italy, although the date was not set, a foreign ministry announcement said.

Reds Seize Part of Key Tow In Cambodia, Are Driven Ou

SAIGON, May 27 (UPI),-Communist troops occupied part of the Cambodian town of Snoul carly today but South Vietnamese forces backed up by U.S. planes and artillery reconquered most of the town in the heaviest fighting since the allied strike into Cambodia 13 months ago.

"The fighting is now over," a spokesman for the Army of the Republic of (South) Victoam (ARVN) said in Saigon, but there may be some small Communist groups still inside the

The spokesman said at least 80 Communists had been killed in the fighting, which began before dawn yesterday and continued into today. Military sources said ARVN casualties were at least 12 dead and 61 wounded. Air Strikes

Air strikes were called in on the town marketplace after a force of about 1,000 Communists drove ARVN infantrymen out of that section of town.

Mesnwhile, the U.S. military command issued its weekly casualty report today. It showed 38 Americans were killed in combat and 92 wounded. Although the overall casualty toll of 130 dead and wounded was the sec-ond lowest of the year, the num-ber of dead was the highest in three weeks.

The ARVN announced it lost 476 men killed in combat last week and 1,015 wounded. The allies claimed killing 3,063 North Vietnamese and Viet Cong troops during the week.

Official figures now show that 45 183 Americans have been killed in action since Jan. 1, 1961. Unofficial figures show 121,330 South Vietnamese and 746,349 Communists killed during the same decade.

In South Vietnam, soldiers of the ARVN 1st Infantry Division combing jungle hills overlooking the A Shau Valley, 375 miles north of Saigon, reported Milling 47 North Vietnamese yesterday

Mortar Barrage

The U.S. command reported that a mortar barrage last night hit a U.S. camp 11 miles south of the Demilitarized Zone (DMZ) and wounded "several" American soldiers.

The camp was nine miles south of U.S. artillery base Charlie 2, where a North Vietnamese rocket attack last Friday killed 30 American soldiers and wounded nearly

South Victnamese troops who overran a signble North Vietnamese base camp just below the Demilitarized Zone found a cache of 98 mystery missiles of a type never seen before in Vietnam, allied officers said yesterday.

The cache of six-root-long rockets was found about three miles south of the DMZ in the aftermath of fighting in which South Vietnamese infantrymen killed at least 60 Communist

U.S. intelligence officers said they had never seen the like before and could not identify them from manuals on Communist weapons.

Not 'Trash Cans'

The rockets were not the heavy 240mm "flying trash cans" oc-casionally used in Vietnam by the Communists, the officers said.

The engine seems to be about twice as large as the engine of a 122mm rocket, and I guess it would have twice the range of a 122—about 20 miles," one officer In the same area, the infantry-

men also located 120 rounds of 140mm rockets, about 1,000 bangalore torpedoes and more than 1,000 recoilless rifle rounds. The region where the battle took place is seven miles north-west of Cam Lo. U.S. B-52 bombers pounded the area Tuesday. In Saigon, the U.S. command

150 Americans Watch Delegates To Paris Talks

PARIS, May 27 (AP).-More than 150 Americans with family members missing in Indochina watched in grim silence today as American South Vietnamese and Communist delegates arrived for the 114th weekly session of the Vietnam peace talks.

The four-hour session produc-

ed no change in the long-standing deadlock, but South Vietnam formally placed on the conference record its proposed arrangements for releasing 570 sick and in-jured North Vietnamese prisoners in the Tonkin Gulf on June 4. American negotiators hope that Hanoi's acceptance of the prisoners may foreshadow a relaxation of its hitherto rigid attitude on the American prisoners held in Communist-controlled areas.

Propaganda, Not Negotiations WASHINGTON, May 27 (AP). -Ambassador David Bruce said yesterday, "We have never arrived at what you would consider a negotiation" at the Paris peace

Mr. Bruce, chief U.S. negotiator in Paris, said the North Vietnamese and Viet Cong are using the talks strictly for propaganda

> The House adopted the higherpay scales last month. But now the salary increases will have to be reconciled in a House-Senate conference and will probably fall somewhere between the \$1 billion the administration wants and the \$3.7 billion that the House ap-

Administration officials played almost no role in the House debate in late March and early April Perhaps this was because they saw little chance of defeat-

ing the pay package there. But there had been a sustained lobbying effort by the administration in the Senate over the last few weeks and supporters of the Hughes amendment believed that it was this pressure that swung the vote against the pro-

Sen. John C. Stennis, D. Miss., who led the debate against the higher pay, based his arguments on two letters from the admin-

One was a letter from David Packard, the deputy secretary of defense, declaring that the additional money for salarles would have to be taken from elsewhere in the defense budget and would have "an extrer ely serious impact upon our national security."

Mr. Packard said the budget cuts would involve the firing of more than 250,000 Defense Department employees and would lead to major base reductions and realignment actions and serious economic dislocations."

The other letter was from the Joint Chiefs of Staff and argued that the reductions of other parts of the defense budget would "substantially impair our capabilities to meet national security requirements.

Sen. Hughes argued that this was not the time to discuss budgetary considerations, since it was not an appropriation hill. Rather than talking about the budget, or even the draft, Sen. Hughes said, "the basic question is one of simple justice: Are we willing to pay our servicemen a living wege when they are putting their lives on the line for our country?"

Merried recruits now have a total salary, including allowances and tax adventages, of \$2,982 per year. The Hughes amendment would have raised this to \$5,425. The administration proposal, which the Senate eccepted, calls for a total compensation of \$4.577.

Two Who Robbed **Boxing Fans Are** Found Murdered

ATLANTA, May 27 (UPI),robbery of scores of fight fans ofter last fall's Muhammad Ali-Jerry Quarry boxing match have been found murdered in New York City.

The bodies of McKinley Rogers jr., 32, of Brunswick, Ga., and James Henry Hall, 25, of Atlanta, were found in a stolen Cadillac in the Bronx May 8. They had Both men had been indicted

last November for the armed robbery of scores of boxing fans, including numerous underworld figures, at what had been billed as a "party" in on Atlanta residence.

An estimated 200 persons, ncerty all of them black, showed up at the Atlanta residence shortly after All, also known as Cassius Chy, fought Quarry in Atlanta. They had been handed engraved invitations at the fight inviling them to a party for

The guests, after being greeted at the door, were confronted in the hallway of the home by masked men with shotguns who ordered them into the basement where they were forced to strip and hand over their cash and iewelry.

60 Silos May Be Defensive

U.S. Reassesses New Soviet ICBM Threat

By William Beecher WASHINGTON, May 27 (NYT).

Defense Department officials said yesterday that the 60 new silos detected recently in the Soviet Union might be intended for two new types of intercontinental missiles rather than one, as was suggested earlier.

A Pentagon official conceded, however, that there was still some uncertainty about this and that therefore a quite different assessment advanced Tuesday could not be ruled out This assessment was that the Russians, rather than seeking to deploy new types of weapons, were actually fashioning and remforc-

ing siles to increase their ability to withstand nuclear attack. The Pentagon officials were reacting to reports Tuesday from Senate Republican sources that the Central Intelligence Agency had concluded that two-thirds of the new silo holes were intendsistant secretary of defense for ed for the relatively small SS-11 intercontinental missiles and not for a larger new weapon, as the Defense Department had suggested previously.

Ouestions Unanswered

While this latest suggestion about the new silos left a number of questions unanswered, officials in various government agencies insisted that this apparent confusion reflected the wide areas of uncertainty that exist within the intelligence community.

The Central Intelligence Agency declined to comment on reports that it differed with the Pentagon's interpretation of the new data. But officials at the Defense Department and other agencies said there was no basic disagreement between the two.

Woman Was Naturalized in 1948

Tries to End U.S. Citizenship To Inherit Millions, Is Refused

NEW YORK, May 27 (NYT). -A 48-year-old woman has tried unsuccessfully to lose her U.S. citizenship so that she might gain a European estate amounting to millions of dollars.
The unusual effort by Mrs.

Iraecma Philippina Simons, who wanted to revert to her original Dutch eitizenship, was rejected Tuesday by Judge Morris E. Lasker in federal court here.

Justice Hugo L. Black had termed U.S. eltizenship "a priceless treasure," Judge Lasker said that "it seems that the plaintiff here seeks a treasure which she would value more, a share of her former husband's substantial estate in which she may have rights under Dutch law."

Mrs. Simons has asked the court to set aside the naturalized citizenship that she and her late husband obtained in 1948. contending now that they had lied when they said that they intended to live in the United States as citizens. Judge Lasker observed in his

15-page decision that Mrs. Simons may well have lacked intention to reside in the United States permanently and may well have secured her citizenship by fraud"

23 years ago.
"However," he ruled. "insofar as she ereks a personal benefit

Chattanooga Calmer

After Week of Rioting CHATTANOOGA, Tenn, May 27 (UPI) —Bars were reopened and citizens walked the streets last

night for the first time since rioting shattered the tranquility of this city of 113,000 last Friday. Authorities said the situation was calm chough to warrant the gradual withdrawal of the 1,500 National Guardsmen ordered into Chattanooga by Gov. Winfield Dunn. City officials and black leaders still were not certain what caused the extended vio-lence that "spilled into the

streets" from vandalism at a

canceled soul-music show last Friday night. Check the Oil, Cut the Tires?

-Arizona Autoists Warned FLAGSTAFF. Ariz. May 27 (AP).—Radio messages written by the Arizona Attorney General's Office are warning motorists about unscrupulous service station practices in the state.

They are being followed up with prosecutions that have resulted in civil suits charging stations with such practices as stashing tires and spraying oil and metal filings on engine parts. The idea is to sell unneeded tires, batteries and other

State officials believe the practices are common throughout the nation, "especially along the interstate highways," Attorney General Jack McCormick said in an interview. But he said it seems to be especially widespread in Arizona. The "threat of the desert, the fear of being stranded in isolated areas" is a factor, Mr. McCormick said. "A motorist

can check his three in the morning, but after driving 200 miles across the desert, he's willing to believe something could have happened to them." He said the state stepped in when repeated warnings were "completely ignored" by station operators. Teams of officials driving "pre-tested and certified vehicles in the best possible condition" started making spot visits to stations, primarily

along interstate highways.

Dealers in Flagstaff, Yuma and Phoenix have been cited to date. Mr. McCormick said more charges are planned. Sixteen dealers have been subpoensed.

public affairs, said it is now agreed throughout the government that the new siles are of two different sizes, but that the largest Soviet missile, the SS-9, could fit into either one. Other sources explained that the idea of two different improv-

Jerry W. Friedheim, deputy as-

ed or all-new missiles arises in large part from the fact that Russia is rapidly rebuilding launching silos for both the large SS-9 and the smaller SS-11 missile at the Tyruatam missile test center near the Aral Sea.

2 Types of Silo

The two types of rebuilt siles at the test center appear to conform precisely to the new silos under construction at operational SS-9 and SS-11 missile complexes in the Ural Mountains, they said. Qualified sources explained that when the new holes first

started appearing last December, they were observed to be slightly under 30 feet in diameter and somewhat larger than holes intended for SS-9 siles, In the first public discussions

this spring, the Defense Depart-ment and other officials speculated that these new holes might either for hardened siles, for an improved SS-9 or for an entirely new missile. The SS-9 has a diameter of

about ten feet, small enough to fit into either of the two types of silo. The SS-11 is roughly of silo. The SS-11 six feet in diameter.

-One out of every five American men questioned in a nation-

wide survey said he helieved some degree of violence is necessary to produce needed social change in this country.

An even larger proportion, nearly one-third, said they were willing to tolerate substantial police force, including shooting to kill, to control student or black uprisings.
"On the whole," said Dr.

Monica D. Blumenthal, who helped conduct the study at the University of Michigan, those figures indicate that American men think that where it is necessary, you should reach for a gum fairly fast."

She presented the findings Tuesday at a two-day social ecience seminar at the Carnegie International Institute, sponsored by the Council for the Advancement of Science Writing. 1989 Report

The questionnaires were administered in 1969 by a team from the University of Michi-gan's Institute for Social Research. The report, based on a study of men only, is planned as the first in a series that will also explore the attitudes of

The sample of 1,374 was selected to represent all men in the United States betweeen the ages of 16 and 64, and to represent all races, regions, economic and social classes

The study began by asking the men to name the things going on within the country that worry them. Some 65 percent cited activities of violence or often associated with violence, usually civil disturbances and political protests. Only one-quarter mentioned traditional forms of crime. Many questions in the survey explored the methods that the men felt justifiable in control-

ling whatever they saw Look to Police

"Although the vast majority of American men agreed that violence has its roots in the social problems of our times, many looked to more punitive legislation and bolstered police forces as a means of prevent-ing violence," Dr. Blumenthal

For example, 61 percent said that "to handle ghetto riots," police should shoot but not to kill. About 30 percent said they should shoot to kill at least sometimes. Similar proportions answered the same way when the question involved controlling student disturbances. Asked when it was justified

to kill another person, 89 pereent said it was permissible in self defense and 93 percent said it was right in the defense of

Address

Why investment Q in Pacific Harbour has such remarkable profit potential..

... because the Pacific Herbour development is geared to the world's major growth Industry—tourism, in the world's fastest developing area-the South Pacific, and in the particular place where the tourist expansion.

... because Fiji is already served by eight international airlines, visited by every cruise ship in the South Pacific, has made tourism its number one industry and now has an acuta need for the type of tourist facilities and accommodation which Pacific Harbour will provide.

... because there is a unique land tenure system in Fili restricting availability of freehold land. Pacific Herbour occupies over 7,000 freehold acres in a prime position on the beautiful Coral Coast.

... because the Pacific Harbour development is unusual in that it is pre-financed and funded by the Company's major shareholders—who include Stater, Walker Securities Ltd. P & O Lines Ltd., and Jardine Matheson & Co. Ltd.

Further details of the Pacific Harbour development can be obtained by complating and returning this coupon to:-Mr. H. M. B. Davies, Pacific Hotels & Developments Limited. St. George's House, 15 Hanover Square, London, W.1.

YUBA OFTY. Calif., May 27 Van Den Huevel to study the charge, and issued a stiff gag rule prohibiting the district attorney and shariff from talking about the case.

Not Identified

Most of the victims were not immediately identified. Sheriff's deputies said they had been killed over a period of about six weeks and buried along a halfmile stretch of the river.

Officers identified two of them as Kenneth Edward Whitacre, 40, of Alameda, Calif., and Signid Emil Beleman, 63, of Marysville, Calif., who was also known as Pete Peterson, He had been missing for a month

Sheriff Ray Whiteaker said the first nine victims found were all white men who had been killed with a machete or a meat cleaver and buried on their backs, their arms raised in a strange, sup-plicant position and their shirts pulled over their bloody heads. The sheriff said there was no

known motive but that the murders appeared to be "sadistic" The victims were found in graves scattered along a onehalf-mile stretch on both sides of the Feather River, one of California's scenic spots, about five miles north of this Central Valley farming community of 25,000. Yuba City is 50 miles north of the state capital, Sacra-

First on Thursday.

The first body was found last Thursday on the ranch of farmer Goro Kagehiro after he discovered freshly turned earth in his orchard and dug it up. He re-ported it to the sheriff and leputies began checking out the

The next day, another grave, this one empty, was found about 400 yards away. A farmer said he found it open about a month ago, kept his eye on it for about a week, then decided to fill it in because he was afraid his tractor would fall in it.

On Tuesday, another body was found, and sheriff's officers started a foot-by-foot search of both banks of the river. The search went on through the night by floodlight in a drizzling rain, One after another, as deputies dug in the sandy riverbank in heavy underbrush, the bodies were turned up-seven Tuesday night and early yesterday, three at midday.

At least nine of the victims had "the same type of wounds in the back of the head, chest and the facial area," the sheriff said. 'Clear' Record

day night but was delayed until today after the conference delegates disagreed over its wording. The Socialist International is an association of 54 democratic Socialist parties with some 14 million members, and with a voting power five times that many. It rejects Communism.

Yesterday, Mr. Brandt said that failure cannot be afforded this time in Britain's negotiations with the European Economic Community_

Mr. Brandt speaking at the second day session of the conference, reviewed Europe's economie and political situation.

"I disagree with those who presume that advancing Western European integration and the efforts to foster all-European cooperation are contradictory," he

I for my part am convinced that they complement one another. I regard the European community not as a mere economic process of great importance but olso as a political start which may be of major importance for the organization of peace." Mr. Brandt returned to Bonn today.

In other developments: The conference said in a resolution on Southeast Asia that the co-chairmen of the Geneva Conference should cooperate in reconvening the meeting; requested the United States to announce "early date" for the withdrawal of American troops from the area and asked North Vietnam and the Viet Cong to "offer a reasonable arrangement for the release of U.S. prisoners of war as a contribution to the success of the Victnam peace talks in

Other resolutions dealt with European integratioo, disarmament and African states.

On European integration, the conference, attended by some 150 delegates from 30 Social Democratic partles, said a possible rnlarged European Economic Community should take the initiative to promote commercial, scientific and technical contacts

with Eastern Europe.
- It condemned colonialism, singled out Portugal's action in Angola. Mozambique and Portuguese Guinea, and pledged support to elements "resisting oppression" in those areas.

On disarmament matters, the underground nuclear tests. an extension of the treaty probibit-Inc nuclear weapons on the seabed and a ban on the development, production, stockpiling and use of biological and chemical

newspapers carried a censored account of his remarks.

"I believe we may soon find it very difficult to receive more military supplies from the United States," Gen. Dayan said. "The Americans now wish to appear before the Arab world as a nation that does not channel large quantities of weapons to Israel."

But the defense minister warned, "Should the Egyptian Army take an illogical decision and aitempt to resume the war by landing troops across the Suez Canal, all its military hardware will end up as heaps of junk in a huge graveyard."

Gen Dayan said President Anwar el-Sadat of Egypt appeared to have taken a tougher stance on the Middle East, thus killing any chance for an immediate interim settlement in the region.

The key Israeli conditions for partial accord, according to the report, remain an open-ended cease-fire along the Suez Canal and that no Egyptian forces will be allowed to cross the canal following an Israeli pullback in the canal area. Gen. Dayan said the extent of the Israeli pullback will be determined only after Cairo accepts the Israeli terms.

President Sadat, in recent public pronouncements, has rejected the Israeli pre-conditions.

Faisal Asks Nixon To Give Attention To 'Aggression'

WASHINGTON, May 27 (UPI). Saudi Arabia's King Faisal received a red-carpet welcome, replete with 21-gun salute, at the White House today, then urged President Nixon to give atten-tion to "aggression" by Israel. President Nixon told the Arab

ruler, prior to a private meeting between the two, that he looked forward to King - Faisal's "wise counsel" toward achieving Middle East peace. The king pointedly referred in his response to "aggression" and "subjugation of our people" by Israel.

After referring to "good rela-tions" between the United States and his country, King Faisal said, "Certain factors and powers have succeeded in disrupting good relations between the U.S. and the Arab Dations.

"We hope that these good relations will be re-established." he added, "The aggression which our countries are subjected to at this time certainly requires the attention of you, Mr. President, and your nation."

Tunnel's 1st Accident

AOSTA. Italy, May 27 (UPI).

—The first traffle accident in the six-year history of the Mont road to traffic for half an hour today. A car slammed into the right wall of the tunned and bounced to the left wall, making a 180-degree turn in the process. The driver walked away

Foils Kidnap Bid

In San Sebastian

SAN SEBASTIAN, Spain, May 27 (UPI).—Four armed men presumed to be Basque nationalists today tried to kidnap the French consul in San Sebastian

but fled when he resisted them,

French consular sources reported.

The attempted abduction of Consul Henri Woliner occurred a

block away from the place where

nationalists kidnapped West Ger-man honorary consul Eugen Beihl last December during the trial of

16 Basque extremists at Burgos. Mr. Beihl was released unharmed in France on Christmas Day.

Consular sources reported two men, one of them poking a sub-machine gun into Mr. Woliner's face, tried to force him out of

his ville and into a car in which another two men were waiting. Mr. Wolmer resisted. He punched the would-be abductors

and shouted for help, the sources said. The two men ran to the car, and drove off.

Trinidad Ruling Party

PORT OF SPAIN, Trinidad, May 27 (Renters) -- Prime Min-

ister Dr. Eric Williams's People's National Movement (PNM) swept to power for a fourth five-year

term in general elections here by

taking all 36 seats in the Trinidad and Tobago Parliament. The elections were fought without

candidates from the major op-position party, which called a boy-cott of the elections.

The PNM first won power in

1956. Yesterday's election was the second since the twin island state became independent in 1962.

That Old Southern Comfort

President Nixon got a hero's welcome in Alabama Tuesday. And why not? He told the throngs in the streets of Mobile and Birmingham exactly what they wanted to hear -or at any rate exactly what most of the white voters among them wanted to hear. With Gov. George Wallace smiling at his side, he said that the South has made "significant progress" in echool desegregation. Then he assailed the North, which he accused of having made "no progress" during the last two years. Whereupon he called for "a new spirit of national unity." Ensign David Eisenhower, the President'e son-inlaw, remarked-rather aptly, we think-that it "seems as though the presidential campaign is already under way."

It is undoubtedly true thet Northerners are guilty of a great deal of pious moralizing about Southern racism and that a great deal of school segregation is perpetuated in the suburbs of Northern cities as a byproduct of residential segregation—those same suburbe were the President has said repeatedly that he will never, never countenance "forced integration." But it is somewhat surprising to hear him say that he has "utter contempt for the double hypocritical standard of those Northerners who look at the South and say 'Why don't Southerners do more about their race problems?"

There is a difference—a difference much too important to be obscured-between the de jure segregation of the South and the de facto segregation of the North; it is a difference rooted in the attitude of official authority. From the day the Supreme Court of the United States declared, 17 years ago, that racial eegregation in public schools violated the Constitution, the elected political leaders of the South-with, of course, a number of wise and valiant exceptions-have engaged in various forms of deliberate, organized and official resistance to compliance with the court decision.

Until just the other day, when the court spoke again, and very sharply, the Nixon administration had encouraged Southern political leaders to believe that the power of the federal government would not be used very vigorously to press them into conformity with the law. And this has been true not alone in regard to schools but in regard to every phase of civil rights. The Department of Health, Education and Welfare, with conspicuous pats on the back from the President, resisted the idea of busing pupils to promote desegregation; the Department of Housing and Urban Development did nothing to diminish racial concentration in urban ghettos by striving to locate public housing projects outside them; and the Department of Justice did all that it could to frustrate re-enactment of the Voting Rights Act and has been tender indeed in allowing the Southern states to jigger their voting laws to dilute black voting power.

Just the other day Attorney General Mitchell modified his stand on the Voting Rights Act in response to bipartisan pressure from Congress, Sen, Philip Hart and Minority Leader Hugh Scott went to see him and apparently persuaded him that Southern states must bear the burden of proving that changes in their election law do not eutsil racial discrimination. Previously, the Attorney General had held that racial discrimination must be proved by critics of any changes in state election procedures-a distinction that gave the benefit of all doubts to the states. It is commendable and it is gratifying that Mr. Mitchell has belatedly seen the light concerning this basic right of citizenship. But he can hardly be astonished if black citizens view it with a certain degree of skepticism-especially in view of the brand of Southern comfort which President Nixon dispensed in Alabama on Tuesday.

THE WASHINGTON POST.

Charades in Prague

International Opinion

Since both Gustav Husak and Leonid I. Brezhnev are intelligent men, neither can take very seriously the current charace at the 14th congress of the Czechoslovak Communist party in Prague. References to the "international assistance" the Soviet Union gave Czechoslovakia in 1968 are unlikely to convince anyone aware of the facts that what happened was anything but a brutal invasion-one that robbed a small country of its sovereignty. At most, Messrs, Husak and Brezhnev are engaged in the retrospective rewriting of history, apparently hopeful that future generations may be not.

Essentially, the seeming love duet in Prague represents a coldly calculated deal between the two Communist leaders. Mr. Husak has set up the party congress as a public demonstration of unquestioned

Never a May goes by without France's

"nervosité"; never a May goes by without

France's weathermen sniffing the wind for

the bracing tang of tear gas and straining

their ears for the sound of the Interna-

tionale; and every May brings its own crop

of special circumstances to make their hopes

and fears seem that much more plausible. In

1959 there was the "political vacuum" left

by General de Gaulle's departure. Last year

there was the left-wing resentment aroused

by the "anti-smashers bill" and the trial of

two editors of a Maoist newspaper. This year

has seen the centenary of the Commune

and the Renault strike. Now that the

Renault strikers have gone back to work

and the various marches to commemorate

the Commune are all over, it seems safe to

say that this May, too, history has failed

to repeat itself. But it has been a month of

"nervosité"-not so much "nervousness" as

"edginess"-such as Mr. Georges Seguy, the

Communist trade-union leader, had warned

Pravda does not appear to share President

Nixon's optimism and devotes only limited

serious fighting.

Israel says it is available for

JERUSALEM. — Israel has now, if skeptically and slowly, come around to the U.S. view that an interim settlement of the Palestine war is both desirable and probably feasible and that such an interim settlement could logically be expected to pave the way for definitive peace.

This, despite doubts and quibbles, can be assessed as the fundamental schievement of the initiative begun by Secretary of State Rogers in 1969 and recently followed up by his visit to

this country, Jordan and Egypt. There are political rivalries inside Israel and sharp differences in some interpretations of the prospect of even a renewed cease fire. Jerusalem has its hawks and doves and some who waver between the extremes. Mrs. Meir, the prime minister, is unquestionably among those who doubt Arab intentions and stress strategic security over political peace.

A Willing Attitude

Nevertheless, for the first time one can note willingness to con-template Israeli withdrawal from advanced positions. This extraordinary little nation has never had real frontiers, only truce lines marking where the last war ended. Now there is growing recognition that these must be pulled back in an interim firststage settlement that would see the Suez Canal reopened and would also measure the ultimate prospects of negotiations for a durable peace.

"Such an interim settlement would be a test case in miniature," says Foreign Minister Abba Eban. a laboratory for final peaceif it is respected. If such an interim agreement can be negotisted, concluded and respected, the whole psychological attuation

Round Two in Cairo

By James Reston

WASHINGTON.—For the time being the U.S. government is visibly pleased and the Soviet government is obviously troubled by the political upbeaval in Cairo and the emergence of President Anwar el-Sadat as the dominant figure in Egypt. But the struggle

for power there is far from over. Secretary of State Rogers established e good personal relationship with Sadat during his recent Middle Eastern trip, and would clearly like to see a quick Canal question that would strengthen Sadat's internal posttion. But Israel is not interested

in sudden diplomacy or in mak-

ing concessions merely to help the Egyptian president.

On the facts of the situation in Cairo, U.S. and Israeli officials here seem to be in general agreement. They agree that Sadet pulled off a major comp or counter comp against his political antagonists. They do not think the divisions within the Cairo government were between proand anti-Soviet factions or between those favoring and those opposing an interim Suez agreement with Israel. They see it primarily as a personal fight for control of the Egyptian government, with Sadat winning the critical first round.

Soviet Anxiety

In the process, however, Sadat was forced to arrest more cabinet members and alienate more opposition factions than he would have preferred. He stirred up considerable anxiety in the Soviet government, whose president has been visiting Cairo, and he must now hold the loyalty of the armed forces and reassure the Soviets if he is to consolidate his power.

Accordingly, Sadat has recently hardened his diplomatic line on the Suez question, apparently to reassure the restive Egyptian officers, and has been pressing the Nixon administration to use its influence to get Israel to agree to an interim Suez settlement on Cairo's terms.

Israeli officials, however, are not prepared to change their ne-gotiating position in the hope of influencing the internal politics of Cairo. They do not think President Podgorny and the Soviet delegation rushed to Cairo to get rid of Sadat, but to avoid a chaotic situation in which their vast investment of men and milltary equipment would be endan-

The Israelis are pleased that Sadat survived the conspiracy

Reston and Nixon

Mr. James Reston, in his column of May 22, which outlined his perhaps optimistic interpretation of President Nixon's foreign policy, closed with an entirely extraneous ending which reminded us with a shock of the spirit in which Mr. Nixon as candidate, congressman, senator and Vice-President had expressed himself. Although the article was complete, Mr. Reston appended a last sentence in which he lumped the entire field of diverse Democratic presidential aspirants together, stating that, as Mr. Reston sees President Nixon "cautiously" moving toward lessening international tensions, "no-body is watching his movements with more attention or less enthusissm than the Democratic presidential candidates." By this oue stroke Mr. Reston implied that the entire field of opposition aspirants would prefer that their country's and the world's peril continue rather than their op-position succeed in ameliorating international dangers and our

own pressing woes. (MIS) JULIAN E. ADLER. Deauville, France.

Russia's 'Mammals'

Once more Russia has tested the mettle of world opinion and found it wanting. The successful outcry of December is nothing more than a husbed whisper in May. Where are the demonstrations, the editorials, the outraged cries of politicians? Today's CMay 21) editorial page contains not one comment on the plight of the Leningrad nine. And to highlight "Saving the Ocean Mammals" while ignoring the future of two-legged mammals in Russia is the height of editorial insensitivity. One would hope that the freedom of the individual would be as vigorously prosecuted by the press as the press prosecutes its own demand for freedom.

J. FROST. Wezembeck-Oppem, Belghm,

Palestine's Past

The premise that after the Romans drove out the Jews, 2,000 years ago, Israel (Palestine) was occupied by the Arabs rests upon a fallacy. While the major part

of the Jews were indeed deported, small group of Jews stayed In other words, the Jews never left Israel, never forfeited their claim to their country. During these centuries Israel was a barren desert with a few Jews and even fewer Bedouins. For instance, in 1850, before any ingathering from Europe, there were 4,500 Jews and 2,300 Moslems in Jerusalem, and Tiberias was a Jewish village throughout this period. It was not until after the influx of European Jews in the beginning of this century, who made gar-dens of this desert, that Arabs from neighboring countries started to come to Israel in great

Fulbright Scholar Sen. Fullright's quotations from

Sen. Taft concerning America's responsibility to get out of Europe presents a real laugher. Does anyone remember the time that president Pulbright of the University of Arkansas was asked by the University of Missouri todelete certain wildly "hawkish" passages from an intended address to the students of the latter school? That was pre-Pearl Harbor. Ah well! One must assume that William Fulbright is beyond the criticisms of men like Tom Wicker, et al.

VICTOR HICKEN. Salzburg.

Airline Fares

Concerning "Airline Economics," Mr. Wiklund is totally uncon-vincing when he says, in effect, that businessmen/regular travelers should not object to subsidizing charter flights and package tours as the quid pro quo for the privilege of convenient schedules, etc. The gross imbalance in IATA's pricing policies, Mr. Wiklund's "differential rating system," is encouraging increasing numbers of businessmen/regular travelers to avoid, when possible, normal scheduled services and instead utilize the services of charters and tour operators, thusrealizing phenomenal savings at no more than customary discomfort. I should think that in the long run such policies can only accelerate the gravity of the air-

lines' financial problems. I might also add that IATA's treatment of hir passengers, in terms of real service, has been reduced even more significantly over the past ten years than have air fares, in terms of real money. What is required is an Internanational Air Travelers Association to attempt to convince IATA of the tospity of many of its coercive and self-defeating polici DAVID LOUTHAN. Marbella, Spain.

Bangla Desh

Re Dr. Jack's letter on "Golden Bangla Desh" and Pakistan Ambassador's rejoinder in the 26 May issue Students of interns tional law should know which Bangla Desh is being referred to. If it is what is supposed to exist in Calcutta, none of the elements prerequisites for recognition exist. That is why all countries including India have not extend-

If the views expressed by the ambassador about India's incitement and active participation have any basis, then what has become of India's policy of neutralism and non-involvement?

The Indian prime minister talks of no military action against East Pakistan yet, while Foreign Minister Swaran Singh has openly threatened such action. This would belie India's concern for peace for the people of that region. Would India's heroic army put her modern weapons in cotton wool and march into East Pakistan with slogans of fraternity? Would the Pakisten army stretch out its do edvocates of peace realize the inherent contradictions and inconsistencies in India's pronouncements and actions?

MOHAMMAD AZAM.

Israel's Tuss'

It is ludicrous that Israel should make such a fuss over a handful of Soviet Jews imprisoned by Soviet courts for violating Soviet laws. Yet the Israeli euthorities themselves have shamelessly imprisoned hundreds. and hundreds of Arabs in the occupied areas for no reason other than resisting the Israeli occupation of their land, not to mention the harsh treatment and imprisonment of their "ori-

entel" Jews, TI BAWARSHI.

GRAND PRIX OF THE XXVth ANNIVERSABY OF THE CANNES FESTIVAL **MUSIC**

'Birds' Of Fine **Feather**

By David Stevens

YONS (IHT),-The effort to breathe new life or the apcearance thereof into the moribund body of opera goes on, the most recent manifestation being "L'Opera des Oiseaux," which has just had its first performances in a typically well-prepared and lively production at the Opera

There was no shortage of the nutward trappings of being up to date The program democratically presents the show as the colaborative effort of Antoine Duhamel, who composes music; Serge Ouaknine and Costas Ferris, who together have written film scenarios and dabbled in a lot of things; Louis Erlo, boss of the Lyons Opera and its imagi-native chief stage director, and Jacques Rapp, Erlo's chief de-

And, in a program note in the best reforming tradition, Du-hamel appeals to antiquity, deploring the separation of spoken and musical theater that more or less dates from the invention of opera by the Florentines almost four centuries ago. A more specific appeal to antiquity is the "inspiration" for the new work found in Aristophanes's "The Birds." But Aristophanes is turned înside out, or at least upside

The spectator entering the theater, even 15 minutes early, finds the modern version of the Greek chorus of birds strutting and fluttering all over the stage and auditorium—actors wearing fan-tastic bird-like headpieces and, below the shoulders, blue jeans and other standard-issue bits of the uniform of today's liberated

Bird Men

The decoration on the stage is an extension of the auditorium, a theater in the horseshoe-shaped Italian style. The orchestra, dressed in bird costumes, is not in the pit but wanders around the stage or is tucked away in the pseudo-boxes on the stage.

Zouc as the Hoopoe in "L'Opéra des Oiseaux."

The Peisthetaerus of Aristophanes becomes Plotr, a para-noiac, self-pitying but gentle anarchist who barangues the hippue-birds about building a city in the air. The birds go to work dismantling the theater-like decoration on the stage, and having done so they leave it that way irstead of building Aristophanes's city in the air. Utopia is not a new city in Duhamel's version, but merely the removal of conventions

In the end Dubamel has done precisely what be has his birds de. He dismanties the trappings of opera, as the word is understood in such post-Grecian tem-pies as the Met and Le Scala. Like his birds he puts nothing in its place. The music is full of transitory delights—songs, the use of words in a purely musical

sense, ensembles, pop music, bird songs, improvisation of all kinds. But transitory they remain.

As far as the performance is concerned, praise be to all. This includes Le Cri, a Grotowskioriented theater group; Zouc, the cabaret comedienne who incar-nated the Hoopoe, the man-bird who is unseated in the gentle revolt of the birds: Duhamel, who popped up from time to time in a bird costume resembling very much the costume of the star conductor, tails and all, to keep everything together, and the entire Lyons company of singing actors who gave this caper the same professionel air as they did their "Tannbäuser," their "Mahagonny," their "Woz-zerk," with their ability to cope with any form of musical theART IN PARIS_

Tinguely and His Machines

By Michael Gibson

DARIS (IHT) .- Artists at the court of the dukes of Burgundy belonged to the harnessdecorators' guild and spent much of their time designing and building such festive indoor structures as a whale that opened its maw to reveal a 24-piece orchestra or tall tower filled with singers disguised as goats and trumpet players disguised as donkeys. But of course the ducal court also nurtured artists like Van Eyck and Van der Wevden.

The work of Jean Tinguely. who stands somewhere in the mid-point between Rowland Emett, Rube Goldberg and Alexander Calder (the catalogue to his show with its slandash layout and devil-may-care spelling appears to have been as-sembled with the aid of archie the cockroach) has something about it that is both festive and provocative. Quite frequently, like the tower or the whale, it is something done for an occa-sion—for a lark and at the same time for a purpose.

The lark is the attractive aspect of any Tinguely venture: All that elaborate and ridiculous junk doing its mechanical St. Vitus dance cannot but tickle the mind. There It also something a bit aggressive about it, and that too urges one to laugh.

Out in the forecourt of the Centre National d'Art Contemporain a large black machine scrapes back and forth making a constant hideous din that is pretty effective in drawing a

crowd. Inside, most of the machines are activated by the visitors themselves. There is a "metamatic" drawing machine, an earlier model of which churned out 38,000 different "works" at the Paris Biennale in 1959. This one will produce a contemporary postcard suitable for mailing, framing or throwing into the wastebasket, in the color of your

"Sadistic"

Some of the machines are musical, some playful, some impertinent and some sadistic...
if you want to call it that. In the latter category is a "Dissecting Machine" into which a grinning dummy has been tightly clamped and is being elaborately sawed, perforated and

tecture were further detriments. Again, the men in the chorus

came off better than the women,

who, in the ballroom scene, were

painfully strident.

able Tomsky.

"Radio Amsterdam" ... 1962 Tinguely.

hacked to bits. Of course since it is the spectator himself who the thing going he can hardly dissociate himself from the nuance of cruelty it cheerfully implies. And it rather cleverly makes the point that there is no real gap between the vicarious enjoyment of cruelty and the act

The musical machines are among the most likably silly contrivances because they are both comically elaborate and purposeful. More fearful are the rusty and neurotically obsessional ghosts of harvesting machines, impotently rattling back and forth. And off in a room by itself is a large, gangly device that is tirelessly playful, and punts rubber balls all over the room as fast as you can feed them

Tinguely's purpose in all this is rather varied. Obviously there is a lot of pure artistic spoof and a healthy derision of the pomp and wind that surrounds "cul-tural events." There is also an ironic comment on the industrial world that surrounds us-its solemn and faultless machines whose ritual demands are as pressing as once were those of the gods. Tinguely's machines are implous satires of this highly organized world that is constantly moving, but to what effective

Finally there is probably some sort of deeper intent tied in with the notions of movement and destruction. The unexpected side of Tinguely's machines is that they actually function despite

purpose?

their structural absurdity. You would not expect a gadget of this sort to last more than a couple of minutes once it is set in motion. Yet they go on turning. day after day. They are well made. But quite often they are made to be destroyed, and in this Tinguely at the same time satisfies an infantile joy of destruction and outrages an instinctive desire for permanence.

In respect to movement, Tin guely is a sort of philosophica and moral publicist. Twelve years ago he showered Düsseldorf with 15,000 copies of a short hortatory tract urging people to "resist the anguished urge of impotence that desires to halt movement, petrify the instant and murder the living," and proclaiming that movement is the only permanent fact. One may find this view bealthy and sympathetic, yet it cannot but be something of a slogan when it is so succinctly expressed. And unfortunately the sort of

movement the artist talks about and the kind he actually produces are not at all the same thing. Immobile paintings in oil and motionless sculptures in stone can be concentrates of the specific spiritual movement Tinguely was thus urging upon the citizens of Düsseldorf. But his craft, though it has much that is witty, enjoyable, engaging and stimulating, and though it may be held to express a certain form of anguish too that is inherent in our civilization, does not reach this level of spiritual mobility through the medium of actual mechanical motion. .

This is of no real consequence where the pleasure we may take from Tinguely's work is concerned, provided one does not wax too metaphysical about it. He does after a fashion incite one to do so-partly because he has something serious that he wants to communicate at the moment of his choice. But he also seems at pains not to appear in any way pretentious. In any event there is much to be gained, I believe, in keeping Tinguely's work and his theory well apart,

Two Productions from the Belgrade Opera

By Theodore Bloomfield

AUSANNE, Switzerland, May 27 (IHT). - The Belgrade Opera opened its eight-day visit actory production of Borodin's sprawling "Prince Igor," followed by a version of Tchaikovsky's "The Queen of Spades" more cougenial to the talents of the company.

Both productions were marred by numerous technical and lighting failures, suggesting inadequate, on -the-spot rehearsal. And both, despite cuts, lasted more than three and a half hours. Neither work has the substance to justify such length and it is understandable that neither has become established in the Western repertoire.

In "Prince Igor," the uninspired staging of Mladen Sablic and the unauthoritative musical direction of Dusan Miladinovic failed to overcome the dramatic shortcomings of the uneven score-and their attempts to do so often backfired. Placing the overture after the prologue may have saved time in scene and costume changes, but it got the evening off to a lame start from which it never recovered.

The omission of the second Polovetsian scene robbed the work

Igor's soul-searching decision to pair of lovers. escape. Further, it gave the misleading impression that Igor had accepted the proposed alliance with the khan, Kontschak, whose to the Lausanne International role was truncated and who thus Festival with a less than satis- became, instead of a generous captor, a swaggering barbarian.

Empty Pageantry

The empty pageantry was less a conflict of hordes than a contrast of costumes. The shavenheaded Polovetsians glowered and leaped feroclously—but even this became monotonous. The well-known Polovetsian dances lost much of their excitement through redundant choreography and vacillating tempos, with stage and orchestra rarely together and, at one nodal point, the various groups not knowing which tempo

A curious byproduct of this production was the shift in emphasis from Prince Igor to his dissolute brother-in-law, Prince Galitzky, who, in Miroslav Cangalovic, found an arresting inter-preter. Indeed, the drinking scene in Galitzky's court was the most successful of the evening. Cangalovic attempted double duty by singing Kontschak but was less at home in this music. For a title character, Jovan Gligorijevic. an aristocratic but stodgy Igor, had rather little to sing. and, aside from eloquent moments in the aria, his voice sounded tired.

In the role of the bereft Jaroslavna, Milka Stoyanovic displayed an opulent and well-controlled soprano and acted with restrained dignity. Zvonimir Krnetic as Vladimir and Breds Kalef as Kontschakovna, the offspring of the opposing rulers, were an un-

of its main personal conflict: interesting and vocally insecure his limited opportunities as the jilted Prince Jeletzky, while Vladeta Dimitrijevic was a person-Considering the sparse develop-

ment of the principal characters, an inordinate burden fell upon the chorus. The singing was inconsistent, with good moments followed by ragged ones, the men generally of Moreover, chorus and orchestra were frequently not together, for which the conductor's indecisive tempos and unclear beat were largely responsible. The orchestral playing was rough, most noticeably in the woodwinds and

Tchaikovsky

The second opera, "The Queen of Spades," proved more in line with the talents of producer Sablic and his designer, Miomir Denic; whose sets for the seven scenes, in shades of blue corresponding to the moods, were the outstanding features of the evening. Hermann's hallucination and madness were strikingly staged with telling use of un-seen voices. Even the stylized festive ballet found the company more at home than it had been on the previous evening.

In the central role of the obsessed Hermann, the promising young tenor Stojan Stojanov Gancey was rather unschooled and his timing was faulty in several crucial moments. He does not have the vocal power to encompass this taxing part, barely getting through the final scene in the card room.

His fatally attracted Lisa, Radmila Smiljanic. was unusually convincing, as pleasing to the eye as to the ear. For the Neva scene, a larger voice and more desperation would have been desirable, but otherwise her rendition was admirable.

Milicia Miladinovic gave a fascinating impersonation of the old countess. Her singing, however, was beset by an excessive vibrato—a trait shared by several other members of the young cast. Nikola Mitic made the most of

Although some Western industry spokesman may counter-

By S. T. Kantin

DARIS.—The heavy artillery at this year's show has been provided by the Soviet Union. Just one week after the Senate once again decided to take the United States out of the supersonic race. Russia is launching an all-ont attack in favor of its Tupolev-144

The first supersonic transport plane to be completed, and according to reports from the Soviet Union, the first one to become operational—perhaps later this year, or next—the Tu-144's entry into Paris has been introduced by a well-orchestrated

aerospace crescendo.

But the whole Soviet symphony sings out one theme: sales. In a social aside, cosmonaut Pavel Popovitch came early to France on a goodwill trip. And he may yet be joined by other Soviet spacemen, who will come all smiles to meet America's astronauts, to see the air show and to show what the Soviet Union is allowing the rest of the world to see.

The American exhibition, reflecting the mood of the Unit-And what the world can see ed States, appears to have ignored this message.

But the ace in the hole of the sparkling new U.S. pavilion is the rarest of items at the air show Show--or for many miles around: a pound chunk of the moon displayed near the Apollo-12 capsule which brought it back

Tupolev-144 supersonic airliner (top, left) and cargo-personnel carrier. at Le Bourget.

As for the U.S. pavilion, it tells the story of what Wash-U.S. Pavilion Has Moon Rock. ington calls the era of the super jet, the wide-body large-capacity planes which are flying today. Apollo, Super Jets but No SST To help it tell that story, and

that of U.S. air and space development the United States has mobilized the Apollo-14 astronauts Alan Shepard, Stuart Roosa and Edgar Mitchell who returned from the moon last February. The trio will come to the air show Monday, hold a press conference, visit the exhibits and socialize with the cosmonwhale before manualty monauts before moving on to a wine feast in Burgundy.

The American flight line is a little more impressive. It will feature, for a few days at least, the world's biggest aircraft, the Lockheed C-5A, and two of its wide-body jets, the Lockheed 1011 Tristar and the McDonnell Douglas DC-10. It will be the first flight to Paris for all three planes.

France, the host country, is siding with both giants. One of the most vocal advocates of the supersonic message, it is proudly showing the Concorde 001, just back from a wing-stretching tour to Senegal. The Concorde, the West's first supersonic air-liner is a Prench-British joint venture which, controversial or not, may well turn out to be a familiar sight over the North Atlantic before the decade is

The Concorde program is part of the good fortune which has recently come to the French aerospace industry and partially explains France's determination to keep that program alive. Some 190,000 persons are employed in the industry which last year merged its three untionalized companies to form the Aerospatiale, a firm the size of General Dynamics, which is a partner in the Concorde and European Airhus projects. The industry last year booked more than \$1 billion in export orders. 37 percent of which was for mili-

tary equipment. The European Airbus A-300B is being displayed in Paris in a wingless mock-up. France's other entry in the airbus field, the Dassault Mercure, a short haul plane, is also expected at Le

Equally significant on France's

flight line is the return of the Breguet 941 STOL transport, Conceived more than a decade ago for French military use, the Breguet 941 can carry ten tons of cargo off a 1,500 foot airstrip and land on a makeship inner city strip, as it has done in Paris, Brussels and New York Known in the United States as the Mc-Donnell Douglas 188, the plane, for various reasons—political, financial, or just plain lack of interest—has never gotten off the

But the lack of interest in STOL craft seems to be coming to an end. At a time when Jacques Block, the chief engineer of the Paris Airport Authority, warns that continued development of airports at current requirements would turn the whole of French territory into just one big air platform by the year 2050, Canada has announced that it will open a short take-off and landing line, including an air network system for STOL planes between Toronto and Montreal by next year.

This will be the first STOL iink between major citles any-where in the world. The Canadians will use the 14 passenger Twin Otter that De Havilland of Canada is displaying at Le Bour-

get.
The number of STOL craft being show in Parls indicates the growing interest throughout the

2), each with its special theme: iday, May 28-Opening day.

Russia's aviation saies organization, recently said; "We plan bringing it to Paris, but that one is the object of our present cconcercial efforts."

He pointed to a nearby model of the Yak-40, the short-haul passenger trijet, which for several years has been a Soviet standout at previous Paris air shows. Not only is it beginning to sell, in the West, however, but the export drive is revealing lots about the Aviaexport drive sales and backup technical capability— being spurred by the need for hard, convertible Western cur-

And the lessons now being learned with the Yak-40 will be applied increasingly to promotion and efforts to sell the Tu-144 in Western markets over the next few years.

Last year, three Yaks were sold to Aertirrenia, an Italian feeder line and which is also franchised to sell the small, sturdy heavily powered passenger jet in the West. Pending official certifleation proceeding, a West German group has options to buy eight; the French plan buying three, as many airlines around

the world including groups in Australia, Latin America and Sattle hased Alaska Airlines, report unequivocal interest,

The Soviet embassy in Washington, moreover has already moved toward obtaining an airworthiness certificate from the FAA-a long, complicated but indispensable process-although the State Department recently said that no action has been taken

In a surprise, precedent-shak-ing move, Soviet officials for the first time last year permitted Italian government aviation teams to inspect the Yak-40 production plant at Saratov, southeast of Moscow to complete certification. lite what people say," Mr. Khartehenko flatly declares, "onslte inspection will present no problems whatsoever, for serious

Moreover, he says that European supply and spare parts depots are being built and that the Yak is being offered in four versions—including a plush executive model, with huilt-in radio-telephone and bar said to be a (Continued ou Page 13, Col. 7)

U.S. Aerospace Industry

WASHINGTON (WP).-For the first time in several years, there are signs that business in the ailing U.S. aerospace business may soon get better.

The Nixon administration has asked Congress for more money for defense in the coming fiscal year, the first proposed hike since 1969. And Defense Secretary Melvin Laird, refusing to be intimidated by congressional doves, has repeatedly warned in recent weeks that still more increases may be piled on if the Russians continue the pace of their nuclear weapons build-up.

 Though production of military aircraft continues to wind down with the fighting in Victnam, the new military spending plan launches the Pentagon into development of a half-dozen new types of warplanes which could easily total more than \$35 hillion in new orders over the next five to seven years.

Hold the Line

 After five years of steady decline from the days when the nation was anxious to get to the moon, the new budget request for

Sees First Signs of Hope

By Michael Getler

space exploration also seeks to at least hold the line at this year's level of just above \$3 hil-· And there is even the pros-

pect that the country's commercial airlines, which collectively lost \$175 million in 1970 and are still losing money this year, may ride out of their depression in 1972 on the heels of a certain attempt by the White House to restore confidence to the economy as a whole in an election year. Despite these signs, however.

company executives are taking nothing for granted. The amazing reversal that the once highflying aerospace industry has suf-fered in the past three years has made sceptics of many of the men in the boardrooms. Their scepticism reflects mostly a realization that the mood of

the country has shifted along with the fortunes of their industry, and that the forces in Congress reflecting that shift are now more numeroos, articulate and well organized than ever before. The country has grown weary of war, suspicious of its erstwhile god of technology, and largely

disinterested in the moon and heyond. Even rock-ribbed, con-servative Middle America seems to have been staggered by the enormous costs of modern day war machinery.

No Longer Routine

Thus, while the Pentagon is pressing to modernize the U.S. arsenal with new planes and missiles long delayed because of Vietnam expenses, the passage of those plans through Congress is no ionger routine.

Sen. William Proxmire. D. Wisc., the Pentagon's number one nemesis and leader of the successful rebellion in Congress against the supersonic transport. views the Senate's anti-SST vote earlier this year as a landmark: dramatic proof that public opinion can be aroused and focused to veto big projects which have strong administration and

financial backing.
This year, Sen. Proximire heads up the Defense Committee of the Members of Congress for Peace through Law (MCPL), a bi-partisan coalition of 115 senators and representatives bound together in opposition to a number of Pents-

The MCFL plans an assault on 14 different military projects in the coming months while the new military budget is still on Capitol

Their opening shot came early this month and recommended killing the Air Force's top priority. \$11 billion project to build a fleet of new B-1 manned bombers to replace the aging B-52s. The MCPL elaimed the bomber may play no role at all in nuclear deterrence in the 1980s and beyond and that even if it were needed a different kind of plane

would be a better bet. The group claimed the real costs would be more than \$20 billion since a decision to build a new bomber would eventually mean a commitment to build a new fleet of jet aerial refueling Dianes as well.

The second MCPL hinst a week later was simed at duplication between the Navy's \$9 billion F-14 jet fighter project, already experiencing big cost overruns, and the Air Force's only slightly less expensive F-15 fighter. If the (Continued on Page II, Col. 4)

(IRT).—The United -are certain to be the principal attractions of the air show.

States has huilt a \$900,000 permanent pavilion at the Paris Air Show, dedicated this year to the Era of the Super Jet, with Next to the space capsule is a mock-up of the lunar rover, the moon jeep, that will be used during the Apollo-15 mission. The nary a display on the still controversial supersonic transport. decoration of this outdoor area Lacking this view into the is used to recall American parfuture, the Commerce Departticipation and the stages of the which sponsors the

conquest of air and space, After leaving this yesterday aspect of the U.S. pavilion, the visitors will enter the today area. through a full-size mock-up of a section of the interior of a Boeing-747 fuselage. The huge passenger cabin serves as an entrance to the main building.

Steel Cable Spokes The main building is a circular structure with a roof supported hy steel cables like spokes on a bicycle wheel and a wall of gilt-colored anodized aluminum. It is divided into two parts, the inner core reserved for businessmen and the outside perimeter aisle for the public.

The outside perimeter tells the story of the wide-body jet in its different aspects. There, the visitor can see, through 16 company booths, panel designs or mock-ups, the eugine of the jumbo Boeing, its landing gear, as well as a coekpit cabin used in the final designing of the air-

The Commerce Department decided on a permanent structure at the Paris Air Show after studies by Charles M. Shaw, who designed the building, indicated that it would turn out cheaper to build one than to rent, and set up a temporary building every two years, as had been done up to now.

According to a ten-year contract worked out with the Paris Air Show authorities, the Commerce Department built the permanent structure, which it turned over to them. The Air Show authorities then lease the building to the Commerce Department for every air show of the coming decade. And because the building will also serve to house other exhibits at Le Bourget on nonair show years, the leasing fee has been set very low.

The second secon

IATA Director Yells Airlines:

Cut Costs to Surmount Current Squeeze

By Knut Hammarskjöld Director General International Air Transport Association

The occasion of the 1971 Paris Air Show, offering the international acrospace industry a shop window to the world, presents a tiosely opportunity to focus attention on the future development of international civil air transport and its impact on the manufacturing industry.

It is clear that the future prosperity and success of the civil aircraft and equipment manufacturers will depend heavily on the parallel economic health and successful development of the airline industry, and particularly on the scheduled airlines which comprise the major market for president of Aviaexport, a wide range of these products.

The 107 member airlines of the International Air Transport Asexpansion required to handle the huge volumes of passengers and

can expect to share the pain. civil air transport industry has continued to demonstrate a dynamic development pattern, and the future growth potential to

ledge that the industry as a whole is currently passing through a down-swing in its traditional financial health cycle. compounded by the recent parallei difficulties and restrictions

World scheduled traffic increased 15 percent in terms of revenue ton-kilometers performed in 1970 (43.17 billion), while total operating revenues increased by 1L8 percent (\$13.02 billion). But operating expenses increased by 11.9 percent and total worldwide gross operating profit for the industry remained at the 5.6 percent level (\$989 million),

after non-operating items such as interest charges, income taxes, retirement of property, etc., will be at a much lower and marginal level. If this position is allowed to continue, in the long term it will be difficult to support either the provision of internal capital or generation of external loans for the necessary investment commitments.

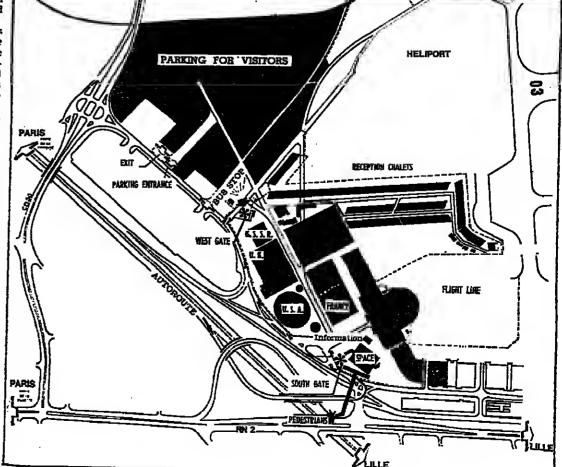

Unit Costs and Load Factors In general terms, the sirlines' present disappointing financial trends can be attributed to low profitability deriving from tha inter-relation of shrinking reve-nce yields unsatisfactory average annual load factors and the bottoming out of the earlier downward curve in unit costs.

This situation, arising at a period of peak re-equipment pro-curement of new fleets of widebodied jets such as the Boeing-747s, DC-10s, L-1011s and A-300s, and possibly SSTs, must also be considered against the present background of spiraling inflation in external costs for equipment, services, wages, fuel, airport/navigational user charges and environmental problems to which the airlines are subjected but over which they have little or no con-

During the 1960s, the introduction of more efficient jet aireraft and other measures to improve efficiency provided a re-duction in unit costs, allowing the marketing of lower normal and special promotional passenger fares and cargo rates to fill the increased capacity produced. These tartif reductions and the increasing percentage of traffic moving at the lower fares and rates produced a decline in average revenue yields.

The downward trend in average unit costs bottomed out a few years ago and there is now an upward movement. The cost benefits of the more efficient high-capacity aircraft are at pres-(Continued on Page 13, Col. 3)

Bonn's Industry Gets Ready To Play Larger World Role

By Hans J. Stueck

many's small but ingenious aircraft industry-59,000 employees and an annual turnover of \$640 million in 1970—is finally bracing itself for a larger role in the international airline business.

After years of hard toil and remarkable, though unprofitable, successes the industry brought out West Germany's first pas-senger jet airliner, the VFW-614.

The VFW-614, powered by two Anglo-French-built Rolls-Royce-SNECMA engines has attracted to date 29 orders and options from airlines in Argentina, Den-mark, Yemen, the Philippines and West Germany. Delivery of the plane is to start before tha beginning of 1972.

The plane was developed by Vereingte Flugtechnische Werke, West Germany's second-largest plane maker, which merged with the Netherlands' Fokker company

VFW states its sales hopes for the \$2.45 million intercity jetliner on thorough market investigations which have shown that 460 airlines in the world need be-tween 1,200 and 1,400 jet-powered feeder aircraft within the coming decade. The company said it hoped to clinch at least 400 of these orders. The bresk-even point on the \$430 million VFW-614 program is estimated at 175

Laying claim to being the world's smallest jet airliner to date, the VFW-614 can carry a maximum of 44 passengers or four tons of cargo over a distance of 415 miles, a handy range to connect major metropolitan airports in central and Western

The VFW-614 is not on dis-The high hopes of West Ger- is rather low-keyed.

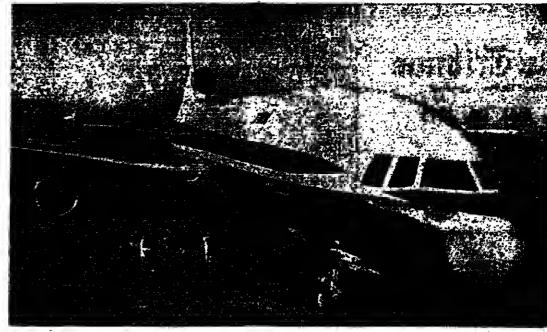

BONN (NYT).-West Ger- man plane manufacturers-the Dornier works' twin-engined STOL Skyservant executive plane is selling like hot cakes with more than 180 ordered contrasts sharply with the gloomy outlook for commercial use of West Germany's VTOL work.

> Although Bonn's Defense Ministry has so far spent an estimated \$400 million on the develop-ment of VTOL aircraft, notably the world's first VIOL transport, the DO-31 by Dornier, a government-appointed expert commission recommended last month the indefinite postponement of a long-expected government order for a civilian VTOL transport modelled after the DO-31. In connection with NATO's

switch from a strategy of nuclear deterrence to one of flexible response with a high nuclear threshold, the Defense Ministry virtually stopped two other VTOL projects after they reached the prototype stage—the Messersch-mitt-built VJ-101, the world's first VTOL aircraft that reached supersonic speed, and VFW-Fokker's VAK-191, an experimental strike fighter which serves as an experimental carrier under a three-nation project to develop a short take-off and landing multi-role combat sircraft,

Another project in the field of military aviation links West Germany's Dornier company with the French Dassault-Breguet group. This program was initiated in 1969 to develop a jet trainer. the Alpha Jet for the French and West German air forces: Right now, the two companies are embarking on the prototype phase.

Considering its notable achievements, the Paris exhibit of the West German aircraft industry

AIRBUS—The Lockheed L-1011 TriStar, powered by three Rolls-Royce RB-211 engines.

Wide-Body Airbus Comes in Three Versions

very new airliners are being presented at the air show, but they will have come here in very different states of readiness.

The McDonnell Douglas DC-10, which will be flown in Wednesday bearing its builder's colors, is scheduled to enter regular airine service later this year; the Lockheed L-1011 TriStar due Monday will be brought in under the power of the much troubled Rolls-Royce RB-211 engines and Its entry into regular service has ocen delayed until that trouble -development, financial, production—is solved. The European A-300B Airbus is shown in a fullsize mock-up with the promise of a first flight next year and service by 1974.

But there are more similarities among the planes than dif-

PARIS - Three very similar, ferences. All three belong to the very new airliners are being current high-capacity aircraft

The first models of the two American planes can carry about the same number of passengers about 270-bave similar ranges, that is 3,600 miles. The European airbus, huilt by a consortium of French, West German and English firms, can transport up to 250 passengers but will limit itself to a range of 2,000 miles.

Similar Missions

Their missions are also very much alike: that is carry the largest number of passengers at one time in order to decongest airports, reduce the direct operating costs of airliners, thus making each flight more profitable (the jumbo Boeings have managed one of the lowest seat-mile costs of any aircraft) and eventually to be able to reduce fares, and cut down on noise and air

The question may soon arise wbether there is enough room on the airliner market for all three planes. The British government, which canceled plans to build a competitive English airbus, the BAC-311. last year, demurred, for among other reasons, fear of too stiff competition.

Yet the firms are going strong, producing and developing their planes for what they believe is a huge market potential.

The builders of the girbus say that there is a market for 1,100 aircraft of the type of the A-300B up to 1980. They carefully specify that their craft is a short-to-medium range airbus, being designed for routes such as are most common in Europe. And they insist that they are not in competition with the larger-capacity, longer-range U.S.

The airbus builders believe ley can capture at least half of the world airbus market with their plane and see the breakeven point of development and production being reached some-where around the 200th plane.

They admit, however, that they have no firm commitments from airlines to buy any A-300Bs, although they have received letters of intention to buy 35 to 40 of their planes

McDonnell Douglas has sold its DC-10 to 19 airlines, including nine in Europe, where they may be used on routes where the Boeing jumbo is not as profitable as expected. The early delivery date of the DC-10 is also likely

to give it an edge where com-petition is sharpest.

Lockheed has announced the sale of 178 TriStars to nine sir-lines, none of which is European and it has promised to start delivery as of 1973. Lockheed estimates the total airbus market at 1,400 airplanes, of which, it believes each builder can get a fair share.

One Too Many

"Among the three, there may be one too many," an official for one of the airbus manufacturers said. However, he felt confident that the market will expand to find room for all of them.

Politics may also play a part in helping airlines choose an air-bux. The European governments which are guaranteeing loans to pay the \$480 million needed to develop the airbus, will not fail, to coax their national sirlines to preferring the European venture, at least on the shorter routes.

And although further delays in the production of the Rolls engine may affect the normal commercial success of the TriStar, the British are likely to have too strong interest in the financial bealth of their major engine manufacturer to look beyond the Lockheed plane.

Israel Comes to Paris Sh As Producer for First Ti

PARIS.-Long one of the more interested buyers, Israel has come to the Paris Air Show this year for the first time as a aircraft producer seeking a market.

Two planes of its production are being shown on its stande: the U.S. designed, but Israeli refined and built Commodore Jet 1123 and the all Israeli-conceived STOL cargo plane, the Araya.

The Commodore Jet is a tenseat executivo aircraft originally developed by the North American Rockwell Co. Israeli Aircraft Industries bought the Commodore Jet production facilities and li-censes from the U.S. firm in 1967 when North American decided to abandon its light executive jet

The plane was then designated as the 1121, of which Israeli Airctait Industries has built more thau 40 units. However, Israeli engineers have since then developed a larger model, the 1123, a roomicr plane which is scheduled to so into production this year at the rate of two per month. The

The West's Only SST

In Controversy Controversy

ARIS.—Confirming the words of French President Georges annidou, "Concorde is here, as eryone can see."

The West's first supersonic insport is at the Paris air ow-following a test flight to kar which is the equivalent of North Atlantic run-supported the assurance that the French vernment will spend all the mey necessary to bring the mio-French Concorde project a successful start.

When Mr. Pompidou became first head of state to fly at ire the speed of sound as he w to Toulouse aboard the Conde earlier this month, he did me than add a page to the Alphonso XIII took to the air one of Wilbur Wright's flying itraptions some 60 years ago.
was warning skeptics, includ-France's vacillating British rtners, and politicions on both is of the Atlantic that the age supersonic transportation had

2#(x)

The Concorde project was a ger, Mr. Pompidou said; many inical and commercial probas had to be overcome. Techally, the plane is a success, he d adding that he was confint that the commercial probos would be solved. The bet s taken and will be kept, Mr. Nevertheless, in an aside prob-

ly almed at American interests, declared that the Concorde riners are prepared to take on her associates in the developent of the West's SST. The technical problems, which . Pompidou said had been lved were mumerous. They

nsisted of building a commerilly viable aircraft capable of des what no military planeth no commercial restrictionsis yet been able to do, that is carry a 4,000 pound payload more than 1,360 mpb on the mid's busiest air route, the orth Atlantic.

After nearly a decade of coopation, the French Aerospatiale ampony, and its British partm, the British Aircraft Corp., are produced the prototypes of airplane that was immediately tacked as being an arch - polter of the atmosphere, a finanal "Dienbienphu" and a comercial dispater.

. The builders of Concorde lost o time in counterattacking. lenri Ziegier. President of Aeropatiale, replied that pollution brough smoke was an instmillant factor compared to the tons I soot bring poured out daily y automobiles, and industries.

Running Away The plane's noise poliution is effectively being attacked on both is fronts, the sonic boom and meine noice. The some boom, & Ziegler sald, is a little known emenon, that is being dealt th in the most discreet way, by mine away While studying mans of avoiding the boom. Conrde would fly at supersonic reds only over oceans or desert les. In any case, Mr. Ziegler ded this is part of the Conray mission, since it is meant boarily as a link between disat places.

As for curine noise, the present impus 503 engines, which will improved on the production giels, are slightly less noisy in these of present subsonic cruit on landing approach. i as noisy on take-off and thtly more notsy on level flight. . Ziegler said.

he supersonic plane's finan-I and commercial battles have n harder to face. Although sident Pompidou said in Toutiest, the French and glish pariners knew well a deie ago that their original esrates of 31 billion for developnt of a plane that would cost million per unit were to be ich below the final figure, the alls were summarized of a shock. evolopment has temped the \$2 lion mark-divided evenly beeen England and France, but ectally heavy for financially d-pressed Britain-and the ne's sciling price has now been at about \$27 million. Slightly re than the Boeing-747.) he cost of developing an aircraft is usually set off against the number of planes sold and the cost of the plane is largely based on the number of units expected to be sold. There can be no such commercial thinking for Con-

No Commitments.

Only 16 airlines have so far taken options for 74 Concordes, and none yet has turned an option into a firm commitment. The plane's builders have stated publicly that there may be a market for 150 to 300 Concordes although they refuse to state at what point they would start making a profit, if ever, on the plane. Most likely, the attitude of the

builders and the governments involved (the French partner, Aerospatiale is a state-owned firm) will probably be that explained by Marcel Dassault, a few months

ago.

Mr. Dassault, a legendary figure among aircraft builders, whose Mirage fighters equip the French Air Force, has been very close to the government on aircraft matters. In a press conference in defense of the Concorde, Mr. Dassault declared that progress in this field depended on the government's willingness to absorb the development costs. Although the progress he was referring to was the development of a super or second generation Concorde: it was clear that Mr. Dassault also had the present plane in mind

The importance of developing supersonic transports is not restricted to the prestige attached but to fulfill what Mr. Pompidou called the "vocation" of France ond Britain, two pioneers of oviation, as well as to keep the aircraft industries of the two na-

Continuation of the Concorde program would be the only current way of keeping them busy by giving French and British aircraft industries a lead of several years over its only real potential competitor, the U.S. aircraft in-

When the United States finally accepts to build an SST, the market may be split up as Mr. Dassault said he had once suggested; American industry will concern liself with long-range supersonic planes while leaving

the medium-range market to Eu-

The commercial operation of the plane remains a big mystery that will be solved only after 1974, the year the Concorde enters airline service. Aerospatiale has declared that the Concorde could he operated profitably with 128 passengers on board paying a fare 25 percent higher than the present tourist class fare across the North Atlantic. That is less than the current first class fare.

Aerospatiale says that at that rate, a flight with only 60 passengers on board out of a 128 passenger-configuration plane would still break even. The French company claims that it would have no trouble filling the planes however, since the Conwould present the major flight luxury, discrimination by speed. And it points out by comparison that all high-speed trains in Europe are money-makers despite their higher fares.

All the present first class traffic, that is 10 percent of the total market, would transfer to Concorde, plus an Additional 15 percent of the tourist market. Aerospatiale says its studies have.

But the airlines are not likely to court economic trouble, and they will probably withhold their firm commitments to buy the plane until the figures on commercial operation turn out to be what they expected.

However, as past experience has shown, the big companies will certainly succumb to competition. Only a major disaster -economic or other--will restrict the Concorde to the French and British national airlines.

Stewart G. Long, International Vice-President of Trans World Airlines-which holds options for six Concordes-declared in Paris earlier this year:

... Whether the present verof the Concorde proves sion economic, whether it will take a second generation Concorde, or another SST, you will be fasten-ing your seat belts and traveling speeds of 1,200 to 1,400 miles an hour within the next three years. And in the 1980s, you are likely to travel in ultra-somic aircraft at speeds up to 2,500

BIGGEST CHOPPER-The Soviet Union's V-12 helicopter, which set a world record by lifting 40 tons at an altitude of 2,000 meters. Powered by four turbines developing 26,000 horsepower, the V-12 can fly at a top speed of more than 160 mph.

U.S. Air Industry Sees First Signs of Hope

(Continued from Page 9) congressional doves have their way, the Navy's F-14 will be

Just a few years ago, such criticism would have been quickly written off. But today more people at least are willing to listen. And the Pentagon, in the last six months, has lost two of its most powerful supporters and committee chairman in Congress with the deaths of Sen. Richard Russell, of Georgia and Rep. L. Mendel Rivers, of South Caro-

Even some of the traditionally hawkish congressional committees have gone in for Pentagon-watching more intensively than ever

The Senate Armed Services Committee under chairman John Stennis, D., Miss., is investigating Air Porce assertions that U.S. defenses against Russian bomber need to be improved and that three different planes are needed for the Army, Air Force and Marines to provide close air support of ground troops.

At stake in the bomber defense debate are plans to build a \$3 billion-plus fleet of new raderand computer-packed early warning planes. Hanging in the balance in the argument over close air support are similarly expensive plans for the Chevenne helicopter, the AX attack plane and the British-built Harrier jet.

Other factors add to the uncertainty surrounding the Pentagon's shopping list. While the arms rather than slowing, it is concelvable that the current deadlock at SALT could be broken and the two superpowers agree to limit some of their weaponry. This could cut down on projects like the \$10 billion Safeguard ABM and the new bomber fleet.

As for production of commercial airliners, the top manufacturing officials admit that the picture on new orders still looks grim. The airlines continue losing

money at a record clip. Until a general economic upswing brings a return en masse of the fly-now/nav-later vacationer the prospect for stepped up prodoction remains dismal. Several airlines have already slipped some delivery dates and options for their new Boeing-747s, McDonnell-Douglas DC-10s and Lockheed

Though the production backler, for these craft is still imorestively high-about \$9 billion-that figure is somewhat deceptive, too. in that it reflects sales made in 1968 and 1969 before things the backlog is sure to slip for a few more years.

Finally, the highly tonted tdea

defense contractors could some-bow successfully beat their swords into plowshares and turn a profit in other commercial or social programs remains a mirage.

State of Health

That the acrospace industry has suffered some bammer blows in recent years is clear, but the industry remains so large and complex that measuring its real state of health is difficult.

For example, by the end of this year the Aerospace Indus-Association estimates that sales will have dropped \$5.5 billion since the peak year of 1968. But that still leaves annual sales of \$23.5 billion a year, not a trifling amount.

Similarly, the industry will have jaid off about half a million workers; but with a million employees remaining, agrospace is still the largest U.S. manufacturing employer.

And it appears that those laid off are bearing the brunt of the industry's recession. Aside from the well publicized financial plight of the biggest of all contractors-Lockheed-the other top half dozen aircraft manufacturers remain in the black, though profits as a percent of sales are

The Pentagon has managed to spread its new plane contracts around so that only General Dynamics and LTV as yet have no follow-up business in sight. But there is always the space program.

Furthermore, the Defense Department is about to start a new \$100 million a year into the industry to keep designers work-

Northrop Offers U.S. Allies Part in Developing Warplane

PARIS.—The Northrop corporation is displaying a scale mockup of a fighter plane, which is the core of what it claims to be a new kind of commercial cooperation development project for military aircraft.

Called the P-580 Cobra, the twin-jet fighter was designed by Northrop to help meet the needs of U.S. Allied air forces for the 1975-1990 period. The plane's performance and capabllitles were decided upon, according to Northrop, after exhaustive consultation with at least 20 European countries, Canada and Australia

Knowing these countries' needlorthrop went on to design the lora, which it says is a satisfactory compromise between the varying requirements. Thins, rather than attempting to sell an airplane designed for U.S. Air Force missions and reflitted for Europeans, or designing an airplane by committee—which has proved costly to those who have tried it—Northrop has tailor-cut a plane which it says will fill most needs of most of the air forces consulted.

Individual Needs

Thus, individual European na-tions which cannot afford to build their own aircraft—best suited for their own particular needs—will be able to obtain a warplane designed with at least some of its particular requirements in mind.

Furthermore, Northrop is attempting to seek the aid of a few of these countries to further develop as well as build the Cobra. Italy, Australia, Canade and Holland bave been consulted on the project and Holland has promised a decision this sum-

The multi-nation involvement Northrop says, would enable the countries participating in the project to develop their own advanced technical capabilities, as

total cost of the planes acquired by producing parts for the air-

Northrop insists that the Cobra was studied not only to fit the military requirements of the nations involved, but also their financial and industrial capacity. This is the first time an Amertcan company has sought to develop a military sirplane with

aid, the company says. Northrop believes that there will be a market for about 3,000 "air superiority", th: ' is, high-quality fighter planes among the United States' allies in the 1975-1990 period. It hopes that the Cobra will be able to capture onethird of that market.

foreign commercial and technical

The Los Angeles-based Northrop Corp. has invested approximately \$20 million in the project since 1966-including more than 600,000 engineering man-hours and 3,000 wind-tunnel hours.

If there is a positive response "soon" from the countries with which it is discussing the project. Northrop can have two prototypes of the Cobra flying by 1973, it claims

Each Cobra, assuming 750 are built, will cost between \$2.5 and \$3 million, it is estimated. The minimum sale for undertaking

the program would be 400 fighters. The Cobra will fly at twice the speed of sound and its acceleration and its rate of climb and turn will make it more than a match for any Soviet fighter in air-to-air combat. Its fighting bility will be 30 to 40 percent better than any aircraft flying loday, Northrop claims.

Named for the flared, Cobrake curve of its wing leadingextremely versatile, able ... give close support to ground froops as well as carrying out its primary in the air.

Ask for one of the world's great whiskies.

And the second second

With New Airborne Mercure

Dassault Aims for the Short-Haul Market

PARIS,—The Dassault Mercure, which is due to take off any day now on its first test flight, is France's and Europe's first entry in the presently popular

Designed as a short-haul, large spacity airliner, the \$6 million Mercure. Dassault claims, will operate at a seat mile cost of up to 15 percent less than that now offered on such jets as the

The Mercure is the second civilion aircraft recently built by Daszault-maker of the Mirageafter the fan-jet Falson. It was conceived following a thorough study of the world market—that is of 3,250 air routes plied by some 200 airlines-indicated that no plane existed that had been specifically built for the shorthaul, high-density mission.

The studies showed that what was needed was a plane with a passenger capacity of 130-to-150, plus a freight hold capable of carrying international standard air containers, which would be most economic to operate on routes of up to 1,000 miles. More than half of all current air traffic is along such routes, the studies

Greatest Increase At the same time, they showed that the greatest increase of air transportation in the near future will be in that area. Thus, without the Mercure, or similar planes, airlines would be faced with the need of adapting aircraft which were built with other goals in mind to fill the require-

ments of high-density short All the planes presently available for these routes have been designed for longer hauls. The next generation of wide-bodied jets have been designed for larger capacity and optimum range twice that of Mercure.

The current recession and resulting effect on airlines, according to Dassault, has shown a higher rate of increase on short hanl routes than on all the others. The economic difficulties of the airlines it adds only further increases their need for specialized aircraft.

According to Dassault, there is a world market for about 1,500 Mercure type aircraft within the next ten years. There is room for 300 planes on the American market alone, and Dassault hopes to be able to take more than half of that market be-

fore competing planes are built. To secure the funds necessary for the construction of the Mercure, Dassault sought the aid of the French government as well as that of other European sircraft builders.

In agreeing to subsidize part of the Mercure development, the French government restricted foreign financial participation in the project to 30 percent. Thus, the French share of the costs was divided between the government (which took 80 percent, that is 56 percent of the total costs) and Dassault, which assumed 20 percent of the French participation or 14 percent of the total costs.

The non-French shares were divided among Fiat, of Italy, which took 10 percent of the total costs, Casa, of Spain, which assumed 6 percent, SABCA, of

Belgium, 6 percent and RMMEN. of Switzerland, 6 percent. Each of these foreign firms also

participates in the building of the Mercure. Fiat builds the rear fuselage and tail of the Mercure. Casa, part of the forward fusclage, etc. In that way the financial interest of each foreign firm in the Mercure is increased by normal business interests. This also increases the which these firms are located will buy the Mercure, if only to assist their local industry.

Airport Expert Warns

Air Travel May Be Expanding Too Fast

By Jacques Block

Chief Engineer Peris Airport Authority ONG-range air transportation has been developing rapidly and spectacularly in the last few years to the detriment of sea transportation. indicating that nowadays time is more of a luxury

than money. Airplanes have also replaced old-fashloned, uncomfortable trains on medium distances. However, at the present time, a crisis has set in in the aeronautic world. and airlines as well as aircraft huilders and the thousands of persons who work for them are suffering its effects.

Concern for the environment, a respectable goal in Itself, is helng used by certain lobbies for less respectable purposes; thus, air traffle in New York is at a atandstill because of the absence of an indispensable fourth airport; thus, London's third airport is still a project for the future aod the supersonic transport appears as an enemy in the United States.

But this crisis did not develop suddenly. There have been mady indications that it was to cook. and that aviation may have grown too quickly in the last 25 years without sufficient coocern for the

problems it created. These problems are expressed by the acrooym PAIN, and painful it is indeed. P is for people: too many and too crowded. A is for access: airports are hecoming inaccessible. I is for income: there is not coough money to finance proper development, and N is for noise, to which every-

ooe is becoming more hostile. What then are the factors which will regulate the evolution of air

travel in the near future? First people. Despite the high rate of growth of air travel, only a minute proportion of the world's populatioo has used airplanes. In fact, it is always the same people

who fly. The 360 million or so air pas-seogers in 1969 (including the Soviet Unioo: really correspond to about 100 million different persons, that is, no more than 3 percent of the world's population. It is even more probable that most flights are filled with "regulars" who account for only some ten millioo persons, or ,3 percent nf the world's population. From this point of view air travel has only tapped the very smallest part

of the potential market. Another characteristic of air travel is that it concerns mostly relatively long distances. The average distance for passengers of countries belonging to the International Civil Aviation Organization is about 750 miles. Airplanes have conquered most of the longdistance routes, some mediumdistance routes and very few of number of fatalities by hillions of the short-distance ones. Here, too, there is a vast potential left un-

The situation is similar for air

freight. Although air cargo has grown by an average of 17 percent per year since 1947—a very high rate—goods carried by plane still account for only an insignificant tonnage compared to world trade.

The future of air transport is certain to follow the opward swing of the loternational standard of living, education, activity and cuiture and become more accessible to larger sections of the world's population

If airlines show dynamism and aircraft consructors continue to improve their planes, they will cootinue to find a market. However, the fact that the market exists is oot ecough; the rorresponding demand must also be

And this is where a certain oumber of difficulties may arise. such as the crowding of air space airports, as well as the finaoclal and social restraints.

Another difficulty exists in the development of airports; where to find the thousands of acres necessary to erect these platforms. A statistical example illustrates this difficulty: if air traffic cootinues to grow at a rate of 14 perceot per year and the rule of 250 acres of airport for each million passengers is to be followed, the whole territory of a country such as France should be covered by

airports by around the year 2050. This conclusion is ohviously absurd, for every development bears its own limitations, unless it creates its own chaoges which can allow it to start on oew bases.

Thus, if air transport continues to grow at a high rate, it will necessarily mean that the needs of airports in area per passeoger year will he reduced sharply. If this were oot the case, then the lack of airports would brake the possibilities for air transport development.

Fortugately, the output of airports tends to grow and other means, such as short and vertical take-off aircraft, are beginning to be introduced, and will undoubtedly be used in future air

There is also the ooise problem. And short or rertical take-off aircraft will be considered a real step forward in the expansion of air travel only insofar as their noise levels allow the use of these aircraft close to urban centers.

The builders of airplanes are

lem: the success of tomorrow's airplanes will depend essentially on their silence. Finally, air transportation has

in the last 20 years to about five at the present time. It continues to drop and is now several dozen times lower than that of auto-

mobile travel.
However, air travel still suffers from one major handicap: ir-regularity. And the irregularity due mostly to weather-about which little can be dooe-and congestion, about which much must be done.

An example of this congestion and the effect it has oo air travel is the London-Paris route. In the last 50 years, despite the con-stant improvement in flying speed, which has cut the flight time between the two capitals, the cityto-city time has remained the same. All the advantages of flying faster have been lost due to airport congestion and greater inaccessibility of airports.

And this while railroads are working all out to improve their already traditional regularity and to speed up their trains.

Thus, air travel is faced with a series of problems to which it must find solutions if it is oot to be limited to only long distances on which its high-speed gives it its one unquestionable

STRAIGHT UP-Canadair's CL-246 transport plane. designed in its civilian version to carry 70 passengers from city vertical short take-off and landing airports.

Cut Costs to Surmount Current Squeeze

(Continued from Page 9) ent insufficient to offset increases in other costs, and this situation appears likely to contione for some time.

Three factors have a major effect on capacity planuing; loug term traffic forecasting; the long lead time for aircraft procure ment: and the air transport industry's competitive structure. The outcome has again been a traditional cycle of excess capacity before the markets develop to give adequately profitable load One inherent difficulty in

achieving the much-needed improvement in average load factors and total annual profitability is the seasonal peaking of scheduled traffic demands and the directional imbalances withio these peak periods. This means that the higher capacity required in the peak seasons when busiuess is good cannot be fully utilized in the off-seasons, and results in lower average aunual load factors.

The scheduled airlines have not

fully aware of this principal prohignored the revenue, costs squeeze with which they are faced, but restructuring of worldwide Industry of this type with its many conflicting interests and national improved tremendously in the objectives cannot be achieved recent past, For example, the overnight.

Major attention, backed by cooperative industry studies within IATA, has been given to market research and analysis of caracity and to development of new types of fares and rating structures to meet both the present and future husiness and vacation travel and cargo market demands.

Many thiogs can and are being door by the lodividual airlines to hold the line on those costs over which they have some ioternal control. Tremeodous efforts are being directed toward improved efficiency and cost-effec-tiveness in a wide variety of

In the external costs area. largely outside the airlines' control. the rapidly increasing user charges and taxes now being levied agaiost the airlines represent a problem which is being tackled by joint industry representation and negotiation. The objective here is not to avoid the legitimate charges, but to ensure that their growth is restrained to a realistic and planned program which would alow sensible economic projections and looger-term sta-

The present phase can propably considered as one of the typical traditional periods of read-justment and reorganization reorganization which is part of the air trans-

bility.

port industry's history and future.

The future pattern of operations and fares and rating structures which will finally emerge may not he those which are fam-iliar today, but will be designed to cope with the advancing era of mass transportation.

The potential is aiready well defined. Domestic and international passenger traffic is expected to expand at an average growth rate of 12 perceot a year up to a total of 1,200,000 million pas-senger-kilometers a year hy 1980. In the same period, cargo traific is expected to climb hy an average 20 percent s year up to 66 billion ton-kllometers a year in 1980, and will hy about theo produce the same annual revenue as passenger traffic.

To achieve this development on a sound basis, international civil aviation will need common understanding and objective planning by the governments, the airport authorities and the airlines alike. It is essential that none of the three elements should be allowed to take special advantages at the expense of the public in this mass travel era.

I must repeat that this is a cyclical but highly resilient in-

STOL Craft Seen Needed As Next Step

PARIS-The STOL plane, considered by aircraft industry and airline experts to be tomor-row's necessary link in air transport development, is poking its practical head through the of the more glamorous wide-body and supersonic Jets.

A bevy of these Short Tuke-Off and Landing planes are present at the air show, includ-ing France's Bréguet-941, Israel's Arava and Germany's experimental Dornier 28-B.

Canada, which has more STOL aircraft operating throughout the world than any other nation builder, is displaying its Twin Otter utility plane, Buffalo mili-tary transport and the plans for its DEC-7 "Quiet STOL" liner.

At the same time, Canada has chosen the period of the year when the problems of aircraft are heing particularly focused upon to announce that next year it will open a regular STOL line between Montreal and Ottawa. This will be tha first STOL system put into effect between two major cities anywhere in the world. It will use six 14-passenger Twin Otters.

Silent Engines

STOL planes, as their name short airstrips, of 1,000 to 1,500 feet compared to much mora than a mile for a conventional nlane. These places are often fitted with more sileot engines to make them apt for flying close to inhabited areas and they can use low-level as yet uncluttered airlanes.

However, until STOL systems are set up, the current STOL aircraft can be used in their civilian roles only as conventional planes. STOL systems would mean that aircraft, airports, navigational aids, air traffic control and supporting services would be tailored precisely to these planes and would be unhampered by other operations.

City airports for STOL planes are feasible both because they need little room and because they may he relatively mexpensive According to the Science Council of Canada, a government-sup-ported body which helps develop the goals of national technology, investigations already condocted have shown that STOL airports capable of handling 5 to 10 million passengers annually can be built, complete with runway and all necessary buildings and parking lots in an area of approximately 40 acres, that is, less than 1 percent of the area and at even a smaller fraction of the cost of conventional airports.

Soviet Display Sets Theme For Assault on World Market

(Continued from Page 9) favorite of Soviat leaders, including premier Alexei Kosygin. The Soviet SST is going to make some Western aviation circles wince in Paris. To be sure, there have been curtain-raisers in the past few weeks,

including full-page colorful ads proclaiming "The Lunckhod is oot for sale—the TU-144—yes!"; It's also been practicing take-offs at Moscow's Sherematyevo Air-port, these past few weeks and carller this month tha SST's designer, 83-year-old Andrei Tupolev took a public swipe at the Concorde and Indirectly, the Franco-British aviation establishment in designation of the concorde and indirectly the Pranco-British aviation establishment in designation (1984). ment in declaring "publicity flight is one thing and regular route flights are another."

Perhaps. But the Soviet Union hasn't seriously shown the SST to prospective customers since a splashy inaugural session in Moscow two years ago and there have been many design modifica-tions made since with at least two known prototypes now in operation.

Airline officials here in Moscow have long-standing requests for a look-see, but have made no purchase commitments. "What's the point in talking about it until we can seriously study the actual goods, one official crack-ed. Most Western observers here count heavily on Soviet officials coming through during Paris Air Show sessions.

Meantime, there are clear signs that the Russians are moving rapidly to put the TU-144 into commercial service, starting with Aeroflot, According to well-informed sources, the first

production versions probably will be delivered to Aeroflot late this

year, or early next year. The Russians have high hopes of selling the TU-144 to the West or sering the TU-14 to the west too, and will be pushing hard during the air show, even though actual sales to Western air-lines couldn't materialize until certification procedures have been completed, a long, and in the case of the Soviet SST, political-

ly-charged series of hurdles. Nevertheless, the Soviet aviation establishment is showing greater interest in going international. Aeroflot is reportedly considering joining the Montreal hased association of airline car-riers and to ahide by its rules. as part of a new, mora Western-style corporate look the Soviet airline is actively grooming for itself.

Moscow's continuing drive for earning hard currency is also playing a major role. With the exception of the Yak-40, the Soviet Union to date hasn't sold any major plane in the West. Admittedly, Aviaexport reports annual voluma of around \$200 million growing at an average of 10 percent per year, but the sales have been primarily to socialist countries, Africa and

Meanwhile. Aeroflot is gradoally developing expansion plans for gradually growing Soviet and international traffic. Last year, Aeroflot carried a total of 75 million passengers and nearly 2 million tons of cargo and mailrepresenting over 25 percent of the world's civil air operations. according to Boris Bugayev, Minister of Civil Aviation.

At a time when size and complexity of aircraft construction programs require greater means than thase of individual European States

U.S. Warns Europeans On Interest Rate Policy

MUNICH, May 27 (WP).-Tho S. government served a warnto its European partners tothat it would not automaticdy raise interest rates to stem ie outflow of dollars that prepitated the recent money mar-

Paul W. McCracken, chairman the President's Council of Eco-omic Advisers, told a press brief-og that while "coordination or armonization" of policies was nportant, we must be sure that ne tail doesn't wag the dog." The dovetailing of policy, in o effort to short-circuit speculave capital movements, be said, s a very complex matter. It avolves a willingness and a apacity to pursue a flexible

Fed Disavows **New Controls** On Eurodollar

MUNICH, May 27 (AP-DJ) .he Federal Reserve Board is iot considering any new regula-ion of the Eurodollar market, ed governor J. Dewey Dazne said it a news conference bere yes-

He said that "there are no new Pederal Reserve regulations being contemplated."

However, he said, the situation does justify looking at some way of at least marginally affecting the differences of (interest) rates n major industrial nations to reduce the disparities that start massive movements of Eurodolers from one country to another. Mr. Deane said that since the

central bankers had agreed at Basel a few weeks ago to stop "re-cycling" funds in the Eurodollar market, there had been no other steps taken to control the

Another speaker, Wilfried Guth of the Deutsche Bank's executive board, said the ourrency crisis that has caused West Ger-many to let the deutsche mark float makes it clear that the Eurodollar market "must be reguleted." He urged that the central bankers devise ways to tame the wild energies of the market. If this is not done in time, he warned, Germany may have to apply exchange controls under which Germans would need permission to borrow Eurodollars.

Alberio Ferrari, managing diector of the Banca Nazionale del Lavoro of Rome, told the news conference that without reserve requirements the Eurodollar martet "may become very explosive."

BIS Sindy Expected

MUNICH, May 27 (Reuters) .-Bundesbank governor Otmar Inminger said today the Bank for Diternational Settlements ilans to complete before the end if next month a preliminary dudy on the Eurodollar market und prospects for its control. Mr. Emminger said the study vill be available before the Com-

aon Market finance ministers neet next month to consider furber possible measures to deal vith the current international constary problem.

However, Mr. Emminger said te doubted any immediate implepentation of Eurodollar market

"It may be a matter of one var, two years or five years. Who on tell at this stage," he said.

Eurodollar Borrowings

WASHINGTON, May 27 (AP-15).—Eurodollar borrowings by I.S. commercial banks from their verseas branches increased \$29 aillion in the week ended May 19 o total \$1.62 billion, the Federal leserve Board reported yesterday.

By Hobart Rowen

combination of fiscal and monetary policy." Without such a deft touch, he

said, we might find over-all results that might not be acceptable for domestic economic rea-The diplometic language aside,

Mr. McCracken was in effect reiterating a warning delivered earlier by Vice-President Spiro T. Agney that the administration would not put the United States through an economic wringer in order to solve the international psyments problem. U.S. officials fear that higher interest rates. as demanded by Europeans, will return the United States to a A top side to West Germany's

Pinance and Economics Minister Karl Schiller, meanwhile, said the float of the deutsche mark provided time for a decision on whether to return to the old monetary system or change it, noting that such changes might even include "devaluation of the

This official, Wilhelm Hankel, did not advocate this course. But he raised the question, as U.S. economist Edward M. Bornstein at an earlier panel, whether the international monetary system could ever fall back the old mold.

Mr. Hankel, Assistant Minister of Economies, said that floating the DM "gives us time" to decide among three choices: Whether to go back to the old system of fixed parities; to resort to a common European float, or to try something new, like eliminating dollars as the world's currency standard and going "on an SDR standard." SDRs, or special drawing rights, are an asset within the monetary system sometimes called "paper gold." Mr. Hankel said that "no one can say what will happen." Other panelists, including Mr. McCracken, Sir Douglas Allen,

permanent secretary to the Brit-

ish Treasury, and Yusuke Kash-

iwagi Japan's vice-Minister of

Finance for International Af-

fairs, had no comment.

Quarterly Net Rises at ICI; Courtaulds Shows '70 Drop

LONDON, May 27. - Imperial Chemical Industries Ltd., one of Eritain's largest industrial enterprises, today reported profit in the first quarter rose 3.8 percent to £27 million (\$64.8 million) However, pre-tax profit dropped

5.2 percent to £36 million from the previous £38 million. ICI said the profit of Carrington Viyella Ltd., a subsidiary, bas

not been consolidated. Domestic sales rose 4.8 percent to £175 million from the previous £167 million, while foreign saics were up 8.8 percent to £197 million from £182 million.

Courtaulds Profits Fall

Courtaulds Ltd. said profit fell 10.3 percent to £263 million (\$63.1 million) from £29.5 million for the year ended March: 31. while group sales rose S3 percent to £659.6 million from £626.5 million the previous year.

The fiber and textiles firm announced a final dividend of 4.792 pence, making an unchanged total for the year of 6.875 pence. The company said costs rose more than £40 million while selling prices were unchanged and in some cases lower. Profit had been affected by industrial disputes, closure of plants and

start-up expenses. Preliminary figures for the current year indicate disappointing results, Courtaulds said.

when it was \$406 million. In March, the United States enjoyed an export surplus of \$245 million. The worsening trade position is likely to fuel new demands

from numerous industries and their friends in Congress for protective legislation, such as quotas on a variety of imports.

The Commerce Department said the bulge in imports could

be attributed largely to increases in fish, coffee, sugar, steel and aluminum. Farm products and aircraft bore the brunt of the

The administration halled the increase as fresh evidence of a solid economic unturn. The Census Bureau's index of leading indicators rose 1.4 percent in the month to 124.1 per-

cent of the 1967 average. The index has climbed 9 percent since the uptrend began in November. The continuing rise "adds further weight to the conclusion that a solid and sustainable economie expansion is under way," said Harold C. Passer, Assistant Secretary of Commerce for

Economic Affairs. Of the eight indicators making up the composite index thus far available for April, five improved and three worsened. Mr. Passer noted that the favorable changes were substantial while erate.

Improvements came in industrial materials prices, orders for plant and equipment, stock prices, the price-labor cost ratio and initial claims for unemployment insurance. Declines were shown in the average workweek, building permits and new orders for durable conds

Economists are not of a single view on the predictive value of the leading indicators. There is general agreement that they have been useful in anticipating economic upturns, but some analysts claim they have thrown off false

King Resources Had \$53 Million Loss Last Year

By John Getze LOS ANGELES, May 27.-King Resources Co., which has suffered setback after setback during the last year, reported yesterday a net loss of \$53 million. A company spokesman talked of the possibility of bankruptcy.

Revenue (millions). 37.8 116.8 Profits (millions)...-53.0
Per Share-2.85
a-Not given.

The Denver-based firm, controlled by financier John M. King, said the 1970 loss includes \$21.9 million of extraordinary charges and a loss of \$1.1 million from discontinued operations. The loss amounts to \$2.85 a share, including \$1.34 a share

from non-operating losses.

King Resources has been in financial trouble since a shakeup early last year at Investors Over seas Services. Problems at IOS caused a slowing of IOS investment in projects sponsored by the Denver firm

The natural resources firm also id it would not pay the interest that was due May 1 on its S 1/2 percent convertible subordinated debentures. Earlier, the firm said it planned to make the payment

within the 30-day grace period. Instead, King said it would offer debenture holders 9,864,000 shares of its 7 percent preferred stock for the nearly \$24.5 million in outstanding bonds. In addition, King Resources

offered the same exchange deal to holders of \$15 million in King Resources Capital Corp.'s nonvioting 5.75 percent guaranteed convertible subordinated deben-

The interest due May 1 on the S 1.2 percent debentures totals \$672,540. Interest on the nonvoting guaranteed dependeres in ununt of \$431,000 is due June 1, the firm said.

FCC Opens Microwave to Competition

ATT, Western Union Monopolized the Field

By Christopher D. Lydon WASHINGTON, May 37 (NYT). -The Pederal Communications Commission (FCC) yesterday opened a new competitive era in the blossoming business of specialized microwave and cable services, a field that American Telephone & Telegraph and Western Union Corp. have long monopolized.

The new policy, covering such things as digital data networks and private telephone lines, was first outlined by the FCC staff last July and unanimously en-dorsed by the seven-member commission yesterday.

Abandoning the traditional policy that has combined exclusive operating licenses with close regulation of rates, the new rules would allow virtually free entry into the business and a relatively

flexible pricing system.
FCC chairman Dean Burch said that the commission's base finding is simply that "com-petition is desirable in the common carrier field," and added that be hoped to see the "classical benefits" of competition, including a greater "variety of services at the lowest possible price."

AT & T, which had opposed the policy, issued a tenfatively favorable comment but did not rule out the possibility of a court

The FCC announcement noted that AT & T and Western Union will be permitted to compete "fairly and fully" against new entrants in the field.

The commission also said that the established carriers would be allowed to drop their rates somewhat in specific situations in order to meet competition. At the same time, the commission anticipated that its toughest problem in monitoring the competitive marketplace will be making sure that AT & T's Bell system does not cut the price on competitive services below cost, in effect sub-sidizing them with earnings from its monopoly telephone network.

Many Applicants

More than 30 different companies have applied to take advantage of the new policy with nearly 50 new communications systems, including two essentially national networks for different specialty users.

The first is a system of privatevoice circuits, designed for farflung business operations by Microwave Communications opened the first small hole in the monopoly two years ago when it won permission to build a limited network between Chicago and St. Louis.

The second is a 35-city, \$375million network that would be built to handle electronic data exclusively by Data Transmission Co., known as Datran, a sub-sidiary of University Comput-

But even beyond these and other applications on file, which the FCC said it would process "forthwith," the new policy means that entrepreneurs of communications services will be free to go into business when and where they choose, as long as they can show technical and financial qualifications.

German Surplus Slips WIESBADEN, West Germany,

May 27 (AP-DJ).-West Germany had a trade surplus of 1.067 billion marks in April, down from 1.885 billion in March and 1.121 billion a year earlier, the Federal Statistics Office reported today. In the first four months. the surplus was 4.720 billion marks, up from 4.074 billion in the like 1970 period.

Turnover Is Very Slow

Wall Street Prices Drift Without a Trend

By Vartanig G. Vartan NEW YORK, May 27 (NYT) -Traders on the New York Stock Exchange continued to act today like drivers who have slowed down for the caution light and are wondering what direction the next detour will take.

Today's statistics were close to

the previous session's. Declining issues led advances, 714 to 573, with 375 issues unchanged. Volume fell to 12.61 million shares from yesterday's 13.55 million. The Dow Jones industrial average closed at 905.78, down 0.63 from yesterday's 906.41.

Some traders quietly continued to take profits, while others sat uneasily on piles of cash. Investors worried about rising interest rates, unemployment, in-flation, the belance-of-payments deficit and the state of the economic recovery.

Far From Peak It was a far cry from the market's action a month ago tomor-row when the Dow chinned itself

The net profit was S.Fr. 115.7 million against S.Fr. 105 million in 1969. Of this amount, after allocations to reserves and other accounts, the sum of S.Fr. 58.7 million are distributed as dividend on the basis of S.Fr. 80. per share. The own means of the Bank, including the carry forward on Profit and Loss Account, now amount to S.Fr. 1,242 million. The Credit Suisse commenced in the middle of last year to issue Saving Booklets. Furthermore, together with two American and one British

banking partners, it formed the London Multinational Bank Limited. The number of affiliated investment funds was expanded by two funds of its own, the Credit Suisse Fund "International" and "Bonds", both of which met with great success. As a result of newly established Branches and Representative Offices, the customers of Credit Suisse have now at their disposal 79 Branches in Switzerland and one Branch in New York with 13 Representative Offices and affiliated eompanies in other countries abroad_ During its history extending over more than 110 years since its foundation

in 1856, the Credit Suisse has successfully weathered numerous economic and political storms and it has developed progressively and purposefully. It will be its aim to combrue to provide for its clients all over the world a comprehensive service in keeping with its high reputation as a leading international bank. E. How to gain the benefits of personal professional investment management... on a \$5,000 account... at no cost, unless you make a profit!

Say goodbye forever to entry fees, supervision costs, fixed costs, cancellation fees, interest charges. If you have \$5,000 in your bank, leave it there. Then give us a trading authority on your account, and leave investment decisions where they belong . . . in the hands of skillful, knowledgeable portfolio managers who make nothing unless the value of your nent rises. The risk is ours, and we're glad to assume it. We are successful enough and confident enough in our analyzing systems and procedures to provide this service to you and thousands of other small investors. We can only make money when you do!

For a complete descriptive booklet, printed in English, German or French, write to:

"No securities or currencies may be sold by the Company." (b) Renomber paragraph 3 as parograph 8. * This resolution requires the opproval of three-foorths of the shareholders present or represented at the meeting and entitled to vote.

(E) To transact such other business os may properly come before the Holders of bearer shares wishing to exercise their rights at the Meeting should deposit these shores with

Kleinwart, Benson (Geneva) S.A., 2 Place du Rhône, Geneva, Switzerland, or ot any other bank which is acceptable to Kleinwart, Benson (Geneva) S.A., not later than 17.15 on the 17th June, 1971, against receipt thereof, which receipt will entitle said shorehalder to exercise such rights.

Holders of bearer shares may vote by proxy by moiling o form of proxy and certificate of deposit for their shares, abtoined from Kleinwort, Benson (Geneva) S.A. or ony other bank that is occeptable to the oforesaid bank, to Kleinwort, Benson (Geneva) S.A., 2 Ploce du Rhône, Geneva, Switzerland. Holders of registered shores may also vote by proxy by means of a form of proxy, obtained and filed in the monner described in the preceding sentence. Proxies ond/or certificates of deposit must be received by Kleinwort, Benson (Geneva) S.A. not later than 17.15 on the 17th June 1971 in order to be used at the Meeting. Curação, 27th May, 1971.

The state of the s

By Alan Truscott

Many players who have learned their bridge skills in other countries have settled in New York City since World War II, but none has made as much impact on the metropolitan scene as a young South African has done recently. The South African, Stan Turecki, who arrived 21 months sgo, not only became the 1970 New York Player of the Year, a title awarded to the most successful tournament player, but also became the first winner of the Richard Spero Memorial Trophy for the best performance in a year in team events scored by international match points.

Turecki received his award last month during the Greater New York Bridge Association's Swiss Team Championship. The diagromed deal is taken from that event.

Sitting South, Turecki steered the partnership into the best siam contract of six spades after his partner had opened with one heart. He could not bid one chib, which would have been artificial and strong in the partnership methods.

Turecki hinted at a slam with a jump shift of two spades and, after North had shown his clubs, both players gave preference bids in their partners' original suits. Blackwood then disclosed that North held three aces and South had to take the best slam. A solid trump suit even if the fit is only a seven-card one will often give better prospects than notrump, so South settled in six spades. He was confident that there would be 11 sure tricks with various chances for a 12th,

West chose to lead the diamond ace after which South had no problem. He could caim the slam after drawing trumps however West continued. He would have had a little more trouble after a trump lead, which would have

given nothing away and allowed the defense to frustrate an at-tempt to ruff a dismond in the

The declarer would eventually have succeeded by ruffing a third round of clubs, bringing down East's queen. If the club queen had three guards instead of two there would have been a chance of dropping the heart jack in three rounds or developing a

HOME LIFE A Story of Old Age By Dorothy Rabinowitz and Tedida Nielsen, Mack

192 pp. \$5.25. Reviewed by Anatole Broyard

was trying to plow right through "Home Life" in order to get my review in on time, but was impossible. Every pages, I had to stop and admire the book-or simply at back and feel it. My God, but my fellow creatures are fascinating! I found myself thinking. How touching how abourd, how real they are! All at once I was delighted to be sharing their destiny. Not that Home Life" is a happy book— far from it. But it doesn't matter, because its people are so dimensional. It's so reassuring—positively exhibitating—to find that we haven't yet been flattened out by life, our features abraded away by the sheer rush of phenomena. Dorothy Rabinowitz can make

you feel the very sweat in people's paims, the jitters in their limbs as they struggle with their anxieties, the restless flickering. of their eyes, seeking or avoiding recognitions, the confusions of tongue and teeth as they try to say two contradictory things at once. At the home for the aged, a son is describing the idyllic life he offered his unappreciative parent, when suddenly he stands up and points: "See that, the color of the file cabinet, see that color? That was the color of the grass out there." And yet his father complained. A daughter is explaining how much she loves her mother, how she'd like to keep her at home. Only her son. her son is 17 now and he needs a room to put a desk in. He needs a desk to study at. It's not a question of her mother's age, the daughter says over and over, not her defective hearing or her funny little habits—it's a question of a place for a desk for her son. A

desk to study at. Another son has a mother who lives contentedly alone-but he worries about her. What if she were to fall and break a blp. hoth hips? She would be unable to reach the telephone. True, he calls her daily, but she might fall after he calls. Though she had no difficulty whatever in walking, be felt that his mother had to fall sonner or later and he couldn't bear the waiting. Like so many other sons and daughters, he felt that it was unreasonable. illogical, for such an elderly person to go on standing upright, She stubbornly refused to progress in life, to advance to meet her inevitable fate,

When these mothers and fathers finally do enter the Home, they sign away everything. Of the 14 paragraphs in the contract; there are 13 detailing the things the resident surrenders and only one stating what the Home offers in return. It is unconditional sur-render: besides all property, real and personal, the resident even relinguishes the right to choose. the manner of his own funeral. What they cannot sign away, systems, their judgment, Many die soon after arriving-the largest number in the first 13 weeks Most of them die alone: there is rarely time to summon relatives. One old man was universally admired at having beaten the rap. While visiting his daughter for a weekend outside the Home, he

had the good fortune to die In his old bedroom.

There are some flerce who stand out, like Mr. In the central hall of his there was an enormous ! candelabrum—a \$25,000 de from a philanthropist, Apr ing the work in the spirit who has received a gu Blazer habitually hung on the uppermost branch ed his books and papers recesses of the sculpture down to write on the ba everyone, however, knew use what was given to hi Stone, for example, he wished to enter the Hor was only persuaded by The staff discovered that ed to sing and sang his signing up. Britain Tops U.S. 1st Time Since 1938 in Walker Cup

By Fred Tupper INDREWS, Scotland, May

T).-Britain has won the Cup for the first time 938 and for only the secse in its 50-year history. scenes of wild excitement, m in cark blue took six sight singles on this final on to win 13 to 11 from eavily-fevored American

mited States had led 61/2esterday and 9-7 after the o foursomes. It was etill ally shead most of the and then this British of comparative unknowns d in all directions.

y Carr, 20, of Ireland, banga putt of 40 feet on the the to win his match from mons 2 up; Warren Hum-19, dropped putts of 35 test for successive birdles 14th and 15th holes to

upset former American amsteur champion Steve Meinyk 2 and 1. Hugh Stuart hoisted an approach into the heart of the 15th green and dropped a hirdle putt from a dozen feet to eventually win from Vinnie Giles, 2 and 1.

And when Bill Hyndman concoded the six-inch putt that meant the winning of the whole match to Dr. David Marsh on the 17th-most famous of all golf holes—the vast gallery of Scots watching roared their exultation. For it was at this cradle of golf 33 years ago that the British and Irish side had taken their lone

AVERICAN LEAGUE

Angeles Rams) is due to open July 9 and the players already have taken steps to put pressure on the owners to sign before the Players Association regular meeting June 26.

On Mondey, plans were disclosed to threaten owners with a "selective strike" if the contract is not signed by then.

During resterday's meetings. the team owners of the National Football League agreed to three rules changes and an improved method for breaking ties in the standings. The rules changes were these:

• Unsuccessful field-goal attempts that go into the end zone may be run out by the defenselve Ali Says Ellis Penalties for holding, illegal

use of bands and clipping behind the line of scrimmage will be taken henceforth from the scrimmage line rather than the point of the foul

• In a situation where double penalties are called on a play in which the ball has changed hands, such as a punt, the team gaining possession may retain the ball. Heretofore the penalties cauceled out the entire play.

The tie-breaking system added two more methods to determine division and conference winners qualifying for playoff berths without resorting to the flipping of a coin, Also,

little go."

RAAU president Eric Shore mid: "It will be an historical occasion." Shore said formal invitations had gone out to ten white an ten non-white South Africans and informal acceptance had already been received.

Sources here said it would be the first time in the history of apartheid that black and white South Africans have been allowed to compete against each other.

Richey, Lutz Win to Gain In France

PARIS, May 27.—Cliff Richey led a strong contingent of American men to the round of 32 at the French Open tennis champlenships today.

Richey, top-ranked in the Unit-ed States and seeded No. 4 for this tournament, blasted Terry Addison of Australia, 6-1, 6-2, 5-0. Bob Lutz of Los Angeles, seeded No. 9, lasted long enough to de-feat Gerald Batirick of Britain. 4-6, 6-1, 1-6, 6-2, 6-2. Lutz was leading 4-3 in the first set and Battrick was behind 15-40 on his own service when suddenly everything went right for the Englishman and he ran off 12 etraight points - including two disputed line calls—and took the set. But in the deciding fifth set. Battrick could hold his service only once.

Tom Gorman of Seattle eliminated Jean-Paul Meyer of France, 10-12, 8-2, 6-2, 6-1. He lost the first set playing from the baseline. then started moving to the net and took the next three.

Homers Against Dodgers

Marichal Leads Giants' Celebration

LOS ANGELES, May 27.—In honor of the 20th anniversary of his first game in the majors, the Dodgers presented Willie Mays with 20 cakes Tuesday night. Juan Marichal and the Giants

applied the icing. Marichal spaced seven hits and hammered a three-run homer as San Francisco extended its Western Division lead over Los Angeles to ten games with a 3-1

victory. A crowd of 40,042 at Dodger Stadium saw Marichal's bomer cap a six-rum assault in the sixth inning, sending Bill Singer to the showers with his ninth loss in

Tuesday

The defeat was a deflating one for the Dodgers who had beld a pregame meeting that was open only to the players and was designed by Maury Wills and Wes Parker to provide adrenaline for

the current series.

Manager Walter Alston and the Dodger coaches were excluded from the meeting. When it was over, and when the game that followed was over, Alston sounded a souther note. a somber note.

"We're going to need a con-siderable winning streak to catch the Giants," he said, "and right now our pitching is just too inconsistent to put that kind of a

streak together." Mays, 40, went hitless as he rested the last three innings after Marichal, now with a 7-2 wonlost record, insured the Giants' victory with his homer.

Reds 7. Pirates 4 Cincinnati took advantage of three Pitisburgh errors to score seven runs in the first two innings and defeat the Pirates. 7-4, giving left-hander Ross Grimsley his first major league

Expos 3, Braves 2 Phil Niekro walked Ron Swobode with the bases loaded in the seventh to force in the deciding run in a 3-2 Montreal victory over Atlanta. Rusty Staub and Bob Bailey walked and Ron Fairly was safe on Felix Millan's error. Niekro then struck out Coco Laboy for the fourth straight time before forcing in the run.

Cards 4, Cubs 2. Steve Carlton tossed a six-hit-

ter for his eighth victory of the season and his batterymate, Ted Simmons, drove in the tie-breaking run with a single as St. Louis beat the Chicago Cubs, 4-2. Lou Brock doubled off Bill Hands to extend his consecutive-game hitting streak to 21. Padres 3, Astros 2

A three-run homer by Johnny Edwards in the seventh gave San Diego a 3-2 victory over Houston 25 Jack Billingham won his first game since April 18. Edwards's

NEW YORK, May 27 (UPD .-Lerry Dierker lost his no-hitter in the seventh inning last night but he was still a happy pitcher. Dierker tossed a one-hitter as the Houston Astros beat San Diego, 8-0, and gave them a dou-blebeader sweep of the Padres. The Astros won the opener, 2-1.

"That's the first one-hitter I ever had," said Dierker, who boosted his won-lost record to 8-I. "I went to the ninth with a no-hitter twice before and we lost both games—one against the Mets when I first came up and two years ago at Atlanta against the Braves. But I had the runs tonight and I thought I could get a ro-hitter."

Wednesday

Ollie Brown blooped a brokenbat single for the Padres' hit. "I had a real good fast ball tonight," said Dierker. "Brown hit a silder. He's a good hitter."

In Dierker's previous ill-fated efforts, he had a perfect game against the Mets for eight in-nings before Eddie Bressond led off the ninth with a hit and Ron Hunt won it for New York with an infield blooper, Against At-lanta, Dierker beld the Braves hitless for 8 2/3 innings before a scratch single ended that bid. He held his shotout through 12 innings and Houston picked up a pair of runs for him in the 13tb. but the Braves rallied for three runs against his relievers to win the game.

Cards 9, Cubs 4

ST. LOUIS, May 37 (AP),-Julian Javier's two-run single and Jerry McNertney's two-run homer in the seventh inning powered the St. Louis Cardinals past the Chicago Cubs 9-4, and into first place in the National League East last night:

The four-run rally wiped out

homer in the sixth inning as Pittsburgh beat Cincinnati, 2-0. Stargell'e 15th homer, after Roberto Clemente's single, enabled Steve Blass to turn in his

Observer

Do It Yew-Self

By Russell Baker

WASHINGTON.—This is the be a wisteria, rent a power saw season when people write to newspapers about their gardening problems and when newspapers respond with unintelligible, confusing or terribly bad advice. Here, for example, is a man writing from Chadd's Ford, Pennsylvania. He has a very large shrub, which he thinks is a yew, and he wants advice about pruning it. "This shrub is maybe 15 feet

in diameter and about 12 feet high," he says, "and is so busy underneath that can't see what's in there. It was here when we bought the house four years ago and we have always left it alone. at least until last

"That was when my brother-inlaw, Charlie, who was then living with us-he had been out of work for several years told us one Saturday afternoon that he was going outside to prune the shrub. I didn't think anything more about it until dinnertime, six hours or so later, when Charlie didn't come in. What's more, he was nowhere to be seen around the house and in fact we haven't seen him from that day to this. What I'd like to know is how I should go about pruning this bush."

The letter is signed "Uneasy." He gets the following reply: Dear Uneasy:

"First of all, put your mind to rest about your brother-in-law's whereabouts. If this shrub is, as you suspect, a yew, Charlie will almost certainly not be in it. The yew can be an ugly customer for a gardener to cope with, but it is basically chicken and hardly ever attacks with real determination.

"If however, you have made a mistake and the bush in question is a wisteria, you could have a problem on your hands. During the last full moon the wisteria at our house began hissing at midnight, slipped a 25-foot tentacle through the porch screen.

and strangled the tomcat. "If you have any reason to suspect that your shrub could

ANNOUNCEMENTS

PERSONALS

and attack it at the base. This will still leave you with a wisteria root, which spreads faster than bad news. The best thing is to have a weekend warrior in the family with access to a military airplane and some 500-pound bombs. Tell him to watch out for your roof, though.

'Now, if you are really dealing with a yew, the dimensions you cite—12 feet high by 15 feet in diameter—suggest that it is badly overgrown and ought to he severely pruned in all directions, but particularly at the top.

"For this purpose, put a step ladder as close to the yew as possible and gripping a pruning saw in your saw hand, climb to the very top of the ladder, making sure to hold onto a high branch for support.

"At the top of the ladder, reach as high as you can with the saw and start cutting. This should tip the ladder, leaving you hanging onto the high branch you have been using for support. As the ladder goes out from beneath you, the weight of your body will snap the branch you are holding, and drop you into the center of

"If you keep your wits about you while falling, the saw will merely cut three or four superficial notches in your rib cage. Call your wife to help free you. When she sees how narrowly you have escaped traction, she should be sympathetic to your suggestion that pruning a yew as big as yours is a task for a professional. Telephone a very ex-

pensive Japanese gardener. "Actually, this shrub of yours may not be either a yew or a wisteria. In preparing my answer to your problem, I have been browsing through the encyclopedia and I note a reference to the carricandicum abifer, as it is known in Latin, which attains its natural growth at a diameter of 15 feet and a height of 13

"There are no illustrations here to indicate what carricandicum abijex looks like at maturity. But it has green foliage. If your shrub's foliage is green, well-all I'm saying is that, just possibly, you've got a shrub there that doesn't need pruning at all.

The Emperor Hadrian once climbed Etna, but it was not even to

look into the crater: It was to see the sunrise.'

A History of Danger: Life Near Etna

By Waverley Root

PARIS.—It was after dark when the plane for Rome took off from Catania's Fontana Rossa airport. I was sitting on the right side, quite by accident, so I saw the speciacle—great tongues of flame licking up into the air, explosions of red stars against the velvet black sky. It was

Etna in eruption, seen from above.

That was in 1966, so it was the same eruption which has now become more violent and more threatening—an eruption 15 years old, for it started in 1957 by blowing a secondary crater through the moun-

In 1966, that meant that two parallel columns of smoke, a fat one and a thin one, rose lazily from Etna to lose themselves in the sky above.

There is no present indication that the lava will turn in the most disastrous direction, that of Catania, Sicily's second largest (400,000 inhabitants) city, and one of the oldest; the Greeks established themselves there in 1728 BC, but the indigenous Signif had built a settlement there before

Dangerous History

But, as Haroun Tazieff, one of the world's foremost volcanologists, has just pointed out, volcanos are unpredictable. Catanians are used to living at the base of Etna, and they are not worrying over-much today. Still, they cannot remain unconscious of the fact that their city in the course of its long history has been partly destroyed by Etna several times and almost totally in 1669.

Drive along the coast near Catania today, and you will remark that the road passes from time to time through a breach in what looks like a thick black wall running down to the sea from the slopes above. They are the hardened remains of lava flows. Twisted, tormented, boulder-like islands rise from the water and fantastically shaped grottoes line the shore. This is lava from Etna again, but there is a local legend that accounts differently for the boulders.

This is the Riviera of the Cyclops, and the story goes that the Cyclops Polyphemus surprised Acis, the son of Pan, his rival for the affections of the nymph Galatea, on the beach. He showered boulders down upon him (an obvious personification of Etna in eruption) and from Acis's crushed body flowed the stream called today the Flume di Jaci. The name is preserved also in those of a number of towns and cities along the Riviera-Aci

Castello, Aci Trezza, Aci Sant'Antonio, and most important of all, Actreale.

The Greeks who colonized Sicily begin ning in the 8th century BC were acutely conscious of the dangerous character of Etna, and they had reason to be-it was sald to have erupted 135 times during their period of domination. They gave it its name, from aitho (to burn) and located beneath it the forges of Vulcan (or in

Greek terminology Hephaestus!.
The Lipari Islanders had another theory that the forges of the god were beneath their island of Vulcano, then called Efesto. Dangerous or not, Etna attracted a special sort of settler from Greece who came specifically to live on the flanks of the volcano, as close as he could to its smoking summit. These settlers were sufferers from tuberculosis, who believed that the sulphurous fumes of the volcano were good for them.

But why did ancient Greeks who had no diseases sensitive to sulphor choose to settle precisely on such threatening ter-ritory? They often did the same thing on the mainland of Italy, where their first colony was established at Cumae, not too far from Vesuvius. Was it hecause they sought proximity with their most dreaded deities, the chthonian gods who ruled the underworld?

Their dominion was the earth, in which the dead were buried but from which also vegetation arose. They were not only the gods or death, they were also the gods of fertility. They had to be planted and the place to placate them was where there were openings in the earth that gave access to their kingdom.

The 8th century BC was perhaps a little late for this to be the compelling reason. Fertility was a factor. Volcanic soils, given a little time, are rich soils. When the Romans arrived they were amazed at the fertile soil of the happy Campania, felix Campania, which had been laid down by Vesuvius and its fellow volcanos. When Strabo sought another area to compare with the Campania, the only place he could think of was the area around Catania, whose soil had been laid down by Etna.

Except for the Conca d'Oro (the Golden Shell) which cradles Palermo, the only important fertile plain of Sicily is that of Catania, where cauliflowers are purple. the Barbary fig ubiquitous, and the base of Etna is ringed with oranges, tangerines. lemons, figs, olives and grapevines. They have survived so far at least seven major ontbursts this century-in 1910, 1917, 1923, 1947, 1949, 1950 and the present one.

Etna's altitude makes for variety in its crops. The largest active volcano in Europe, it is almost 10.750 feet high, which means that its summit is covered with snow during six months of the year in spite of Sicily's sultry climate without and the fires within.

Its base is the regione collicata, intensely cultivated, where some crops yield five times a year. Vineyards tend to predominate on the southern and eastern sides olives and grain on the northern and western, and citrus trees grow every-

Strong Wine

This gives way at about 4,000 feet to the regione boscosa, the wooded zone, which produces chestnuts-until about 1850 there was one chestnut tree, still bearing, which had provided nuts for the ancient Romans. It was believed to be 2,000 years old and might be there today if it' life had not been cut short by an eruption. Above the regione boscoss lies the regions deserta, which produces nothing, except,

Sicilian wine is strong, but that of Etna is reputed to be especially so. Some of it is, some of it isn't-it depends on how high up it grows. The alcoholic content mounts with the altitude. At 3,900 feet, where the vines stop, their wine reaches 15 degrees. It would be logical if Etha wines were labeled, not according to the localities where they are grown, but according to altitude.

However, so far as I know, only one

That is Etnei di Mezza Montagna for Halfway-Up Etna) and the reason why this one is thus distinguished is that the best wine of Etna is supposed to come from this height. I must have missed the right altitude. I suspect that Etna wines get more attention than they would if they grew on less eventful soil.

The potential eventfulness of Etna is perhaps underestimated by the curlous tourists who have thronged to Sicily to take in the spectacle, regardless of the possible danger. True, they have excellent precedent.

The Emperor Hadrian once climbed Etna and it was not even to look into the crater; it was to see the sunrise. But just around the corner is a generally safe and sane eruption—on the island of Stromboli. which goes off every two hours, releasing its lava through a well-worn, unthreatening channel into the sea. This, if any, it the exception to Mr. Tazieff's rule that volcanos are unpredictable.

A new Chrysler for \$300.

It is very simple. Chrysler France, through her associate Locasim, will sell you a Chrysler car for the duration of your stay in Europe. buy a car (the insurance ter bargain. is included in the price), you use it for anything from one to six months with unlimited mileage, and when the time comes for you to leave, we will

buy it back from you at

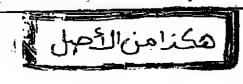

How is it possible? a price already agreed upon at the time of purchase. Thus, during your stay in Europe you will have had a new car at an unbeatable price.

Europeon\$5aday? That is to say that you Chrysler can drive a bet-

\$300 : calculated per month on a
